Vorrede.

Das, was ich hier zu sagen habe, ist nur wenig. Eine frühe Bekanntschaft mit der englischen Sprache und Litteratur lehrte mich auch frühe das große Bedürfniß einer festen Bestimmung der englischen Aussprache kennen. Diesen Mangel fand ich auf die befriedigendste Weise in dem Sheridanschen Wörterbuche endlich gehoben; und da dieses Werk selten oder gar nicht in unsre teutschen Buchläden kam, und ohne Nutzen durch die beygesetzten, sehr mangelhaften Bedeutungen um die Hälfte größer und theurer geworden war; so glaubte ich, dem teutschen Liebhaber dieser Sprache eine nützliche Arbeit gethan zu haben, wenn ich ihm dieses Werk in der gegenwärtigen Gestalt zu seinem Gebrauche überreichte. Außer den bemerkten Drukfehlern werden sich wohl wenige mehr im Werke finden. Meine beyden Freunde, die Herren Voigt und Fischer in

Coburg, haben mit mir die Correctur besorgt: für welche mühsame Arbeit sie gewiß nicht allein meinen Dank, sondern den Dank eines jeden Liebhabers dieser Sprache empfangen werden.

Moritz hat zur Erlernung der englischen Sprache die beste Sprachlehre, Adelung das beste Wörterbuch in Ansehung der Bedeutungen gegeben —; und Sheridan hat gewiß nicht weniger für die Aussprache gethan. Neustadt an der Heyde den 6. Aug. 1791.

I) Ueber das Bedürfnis, eine feſte Beſtimmung der engliſchen Ausſprache zu erhalten.

Thomas Sheridan wurde zu Guilia in Irland 1720. geboren, und ſtarb den 4. Auguſt 1788 zu Margate, wo er hofte durch den Genuß der Seeluft ſeine geſchwächte Geſundheit wieder zu erlangen. Er ſtudierte in ſeiner Jugend, verließ nachher die Studien und beſtimmte ſich dem Theater. Als Schauſpieler und Director einer Schauſpielergeſellſchaft lebte er zu Dublin, und jedermann ſchätzte ihn da als einen rechtſchaffenen Mann. Ob er gleich die Studien inſofern verlaſſen hatte, daß er nicht durch ſie ſeinen Unterhalt ſich erwerben wollte, ſo hörte er doch nicht auf auch als Schauſpieler für die Wiſſenſchaften zu leben.

Verſchiedene, wohlaufgenommene Schriften *) bezeugen dies. Sein Hauptſtudium blieb ihm die Mutterſprache, und um dieſe hat er ſich unverkennbare, unſterbliche Verdienſte erworben. Als Vater wurde ihm die Freude zu Theil, in ſeinem Sohne, dem Verfaſſer der Läſterſchule, einen der erſten Redner der Nation geehrt zu ſehen, von dem manches Pamphlet ſagte, er ſey mehr als Cicero. Da er die Kunſt des

Schauspielers nicht bloß als Brodstudium trieb, sondern über sie dachte, so mußten die verschiednen Arten der Aussprache sehr bald ernste Vorwürfe seiner Betrachtung werden. Früher aber noch, als er diese Art zu leben wählte, hatte er Veranlaßung erhalten, über seine Mutterspracbe, und besonders über die richtige Aussprache derselben Untersuchungen anzustellen Ihm glückte es, daß er in seiner Jugend dem Dechant Swift bekannt wurde; und von dieser Bekanntschaft führt Sheridan vorzüglich seine Legitimation, um vor andern berechtigt gewesen zu seyn, der Aussprache eines ganzen Volks Gesetze vorzuschreiben. Sheridan nimmt die Regierung der Königin Anne als das goldne Zeitalter der englischen Litteratur an. Zu den Zeiten dieser Königin wurde die englische Sprache am Hofe mit eben der genauen Sorgfalt in der Aussprache geredet, wie die Französische am Hofe zu Versailles. Vom Hofe sagt Sheridan, sey diese reine Einförmigkeit der Aussprache ausgegangen, und habe sich mit so behauptetem Ansehen in alle gute, gesellschaftliche Cirkel verbreitet, daß ein unrecht ausgesprochenes Wort und ein unrecht buchstabirtes Wort vor gleich schimpflich gehalten worden. Als aber ein fremdes Haus auf den englischen Thron gelangt, so seyen mit diesem zwar sehr viele glückliche und wohlthätige Ereigniße der Nation zu Theil geworden, allein nur die arme, englische Sprache sey durch die französische vom Throne verdrängt worden; und mit diesem Verdrängen der Sprache vom Hofe sey auf die Richtigkeit der Aussprache immer weniger Aufmerksamkeit gewendet worden, so daß es endlich dahin auch gekommen, daß in den höhern und guten Gesellschaften selbst häufig ganz unrichtig die Worte ausgesprochen worden. Daher befürchtet nun Sheridan, daß, wenn diesem immer mehr um sich greifenden Uebel nicht zeitig entgegen gearbeitet, und der Aussprache eine feste Bestimmung gesetzt werden würde, die englische Aussprache in kurzer Zeit in einen wahren Jargon ausarte, deßen Wesentliches in der Freyheit besteht, nach eignem Belieben jedes Wort auszusprechen. Ich überhebe dem teutschen Leser das Verzeichniß aller der Unbequemlichkeiten, die aus einer nicht gleichen Aussprache einem Volke bey seinen Geschäften aller Art erwachsen, aus dem Sheridan hier zu lesen; denn der nachdenkende Leser ist zu seinem Verdruß längst davon aus seinem teutschen Vaterlande überzeugt, wo Münze und Aussprache durch eine unendliche Verschiedenheit gleich comisch und lästig sind. Noch aber, glaubt Sheridan, sey es Zeit für die feste Bestimmung der englischen Aussprache sorgen zu können; denn die richtige, wahre englische Aussprache habe sich gleichwohlen noch nach

der Königin Anne bey einem Theile der Nation erhalten. Swift, dieser große Schriftsteller, der seinem Leser nicht nur richtige, scharfe Gedanken gab, sondern ihm diese seine Gedanken in einer correcten Sprache schrieb *), schenkte von jeher auch die schärfste Aufmerksamkeit der richtigen Aussprache, die er selbst in hohem Grade anerkannt besaß; es war ihm so unerträglich, ein englisches Wort unrichtig ausgesprochen zu hören, daß er gegen seine Freunde, wenn sie eines solchen Fehlers sich schuldig machten, sich auch die Freyheit nahm, sie zu corrigiren. Sheridan war nun nicht nur in seiner Jugend häufig um Swiften, sondern genoß sogar auch das seltnere Glück mehrere Monate hindurch drey oder vier Stunden des Tags dem in Styl und Aussprache so sehr correcten Dechant vorzulesen, und dabey desselben Tadel und Verbeßerung zu vernehmen. Sheridan erkennt auch mit Dank den vielen Nutzen, den in dieser Absicht ihm der Umgang mit dem Herzog von Dorset und dem Grafen von Chesterfield gebracht hat. Beruf hatte also Sheridan vor vielen andern, sich der Erforschung der festen Grundsätze der englischen Aussprache zu unterziehen. Er fühlte diesen seinen Beruf, aber auch die Schwierigkeit der Arbeit, und gab seine lange und mühsame Arbeit im Jahr 1780. in zwey Bänden in gr. 4to, unter folgendem Titel heraus:

A General Dictionary of the english Language. One main object of which, is, to eſtabliſh a plain and permanent ſtandard of pronunciation. To which is prefixed a rhetorical Grammar. By Thomas Sheridan, A. M. London: printed for J. Dodsley, Pall-Mall; C. Dilly, in the Poultry; and J. Wilkie, ſt. Paul's Church-yard.

Der allgemeine Beyfall, mit welchem dies Werk aufgenommen wurde, machte im Jahr 1789. eine zweyte Auflage nothwendig; und der unermüdende Fleiß seines Verfaßers, welcher vor der Erscheinung der zweyten Ausgabe starb, hatte doch auf tausend Wörter sein Buch vermehrt, und eine schätzbare Anweisung für Ausländer zur Erlernung der englischen Aussprache noch beygefügt. Nach dem Tode des Verfaßers unterzog sich

*) Blair, ein vortreflicher englischer dogmatischer Schriftsteller urtheilt über Swift: He is esteemed one of our most correct writers. His style is of the plain and simple kind; free of all affectation, and all superfluity; perspicuous, manly and pure. These are its advantages. But we are not to look for much ornament & grace in it. ſ. Lectures on Rhetorick and belles Lettres, Vol, II, Lect, 22.

der noch nicht ganz vollendeten Arbeit ein Mann, der ebenfalls der Sache kundig war; dieser vermehrte dies Wörterbuch noch mit einigen schätzbaren Zusätzen, und gab es ebenfalls in zwey Bänden in gr. 4to unter folgendem, etwas veränderten Titel heraus:

A Complete Dictionary of the english Language, both with regard to Sound and Meaning. One Main object of which is, to establish a plain and permanent standard of pronunciation. To which is prefixèd a prosodial Grammar. By Thomas Sheridan A. M. The second Edition, revised, corrected, and enlarged, by the Author. London: printed for Charles Dilly, in the poultry.

Ein anderer äußerlicher Vorzug dieser zweyten Ausgabe ist das von Scott nach einem Gemählde von Stewart vortreflich gestochene Bildniß des Verfaßers.

So einstimmig im Ganzen von Kennern diesem Wörterbuche ein unschätzbarer Werth in Ansehung der festen Bestimmung der richtigen Aussprache zuerkannt wurde, so wurde demselben doch beynahe eben so einstimmig sein Verdienst in Ansehung der Bedeutung der Wörter gänzlich aberkannt. Um dieses denen zu beweisen, die das theure Werk nicht selbst vor sich haben, und durch eigne Prüfung sich davon überzeugen können, will ich nur folgende Urtheile andrer darüber anführen. Herr Hofrath Lichtenberg in Göttingen, einer der größten Kenner der englischen Sprache und Litteratur, urtheilt im Göttingischen Magazin über dieses Wörterbuch: "Als Wörterbuch thut es wenig Dienste, und wer hier Erklärungen schwerer Stellen suchte, würde vergeblich suchen. Wem es aber darum zu thun ist, zu wißen, wie die Wörter jetzt ausgesprochen werden, und zwar von der Claße von Leuten, bey denen man nur allein die ächte Aussprache bey allen Völkern zu suchen hat, dem ist dieses Werk unentbehrlich."

Ein Gegner von Sheridan, der etliche Bogen, von denen ich am Ende noch etwas sagen werde, unter dem Titel:

A Caution to Gentlemen who use Sheridan's Dictionary. To which are added, for the assistance of Foreigners and natives, select Rules for pronouncing English with precising and Elegance. The third Edition. London Printed for G. Bourne &c. MDCCXC.

hat drucken lassen; sagt: "Mit dem äußersten Mißtrauen und mit Ehrfurcht übergebe ich dem Urtheile des Publicums folgende Bemerkungen. Keine unedle Eifersucht auf Sheridan's Ruhm brachte sie hervor; auch bin ich so glücklich, daß mein Tadel seinen Geist nicht beleidigen, und seinen Glücksumständen

»keinen Schaden bringen kan, denn er ist über die Grenze »menschlicher Angelegenheiten hinübergetreten und bleibt gleich»gültig beym Lobe und Tadel. Sein Anspruch auf Beyfall »ist außer Streit. Betrachte ich den unschätzbaren Werth ei»ner cultivirten Sprache, so vermag ich nicht genug meine »Hochachtung gegen den Mann auszudrücken, deßen Fleiße »wir die beste Theorie der Töne der Wörter schuldig sind, »die biß jetzt in diesem Königreiche erschienen ist.« Und da» gegen Seite 18. »Sein Wörterbuch hat an sich als Wör»terbuch durchaus keinen Werth. Sein Verdienst erhält es »einzig und allein durch die Regeln der Aussprache; und in dieser »Rücksicht kan der Verfaßer ganz unstreittigen Anspruch auf den »Ruhm der Originalität machen.«

Bey der allgemeinen Liebe, die der Teutsche, und das mit Recht, für die englische Litteratur und Sprache trägt, kan diesem der Gebrauch dieses Werks nicht anders als sehr willkommen seyn. Allein die Höhe des Preißes des Originals, und die englisch geschriebenen, dem Anfänger in der Sprache also noch unverständlichen Grundsätze der Aussprache mußten diesen Gebrauch für den teutschen Liebhaber dieser Sprache hemmen und verhindern. Bey der Verpflanzung dieses Werks auf unsern Boden wurde aber und mußte sogleich die ganze eine Hälfte des Werks unbrauchbar werden. Denn da es hier einzig und allein darum gilt, die Gesetze der Aussprache nicht nur fest zu bestimmen, sondern diese Gesetze selbst an jedem Worte des ganzen englischen Sprachvorrathes angewendet zu zeigen, um dadurch alles Unbestimmte zu entfernen, und dagegen gleichsam eine feststehende Norm zu haben, auf welche man in zweifelhaften Fällen zurückgehen kann; — wozu sollte hier die angegebene Bedeutung der Wörter dienen? da diese doch nur als ein offenbarer Nebenzweck ärmlich ausfallen mußte; denn der englische Verfaßer sagt selbst schon auf dem Titel seines Werks, daß die feste Bestimmung der Aussprache sein Hauptvorwurf gewesen sey. Nicht also die Bedeutungen der Wörter anzugeben, sondern lediglich die Aussprache derselben fest zu bestimmen, ist der Zweck des Sheridanschen Wörterbuchs. Für den ersten Zweck haben bey den Engländern Samuel Johnson *) und bey uns Adelung **) gesorgt; und der letzeere zwar, auf eine

Art, die noch beträchtliche Vorzüge vor dem johnsonschen Wörterbuche hat; aber leyder ist das vortrefliche Adelungsche Werk nicht beendigt, und jeder Verehrer der englischen Litteratur wird seine Bitte zu der meinigen, die ich lieber hier als gar nicht äußern wollte, gesellen, daß doch der Verfaßer es sich gefallen lassen möge, ein so meisterhaft angefangenes Werk bald zu vollenden, und nicht zu gestatten, daß vielleicht ein Stümper es mit einer unbrauchbaren Fortsetzung besudele.

Bey der Ausarbeitung des Sheridanschen Wörterbuches für die Teutschen wird also vornehmlich erfordert: daß sowohl die vom Sheridan vorausgesetzten Grundsätze der englischen Aussprache deutlich vorgetragen, alß auch die Wörter mit den ihnen zur Bestimmung der Aussprache beygegebenen Zeichen richtig und genau abgedrucket werden. Nicht nur dieses beydes zu leisten bin ich bemüht gewesen, sondern ich habe auch einen Versuch gemacht, den englischen Ton noch neben der Sheridanschen Bezeichnung durch unser Alphabet anzugeben. Das Mißliche bey einem solchen Versuch ist mir gar nicht unbekannt; ich weiß sehr wohl, daß es immer unmöglich bleibt, den englischen Ton durch unser Alphabet ganz anzugeben. Ich bin daher einverstanden mit dem einsichtsvollen Urtheil des Göttingischen Recensenten; welcher bey der Anzeige des Arnoldschen englischen Wörterbuches sagt: "Es ist durchaus unmöglich, mit "unserm Alphabet die mannigfaltigen Mischungen und Schat"tirungen der Englischen Vocalen und auch einige Consonan"ten die uns ganz fehlen (th, j, ing, wh) auszudrücken. Möchte "man doch Sheridans Methode der Bezeichnung unter uns be"nutzen!" *) Die Benutzung der Sheridanschen Methode war aber wohl auf keine andere Art möglich, als auf die angegebene und hier versuchte, denn die Sache beruht doch hier lediglich auf Autorität; wir wollen von dem Fremden selbst wißen, wie er seine Sprache ausgesprochen haben will. Neben diesen Originalzeichen aber steht wohl immer auch ein anderer, nach dem ersten gebildeter Versuch in dem Alphabet des Volkes, für welches dieser ausschließend bestimmt ist, nicht ganz an der unrechten Stelle. Alle Bezeichnungen des Tons sind ja doch nur Schattenrisse des Tons; wenn man den Ton selbst nicht durch den Gehörsinn empfangen und aufgenommen, und da-

durch ihn klar unterscheiden gelernt hat, so sind alle Zeichen unnütz; wenn man ihn aber durch das Gehör hat kennen gelernt, und wenn nachher mit diesem gehörten Ton ein ihm zugegebenes, ihn vorstellendes Zeichen verbunden worden ist, so hat dies zur festen Erhaltung des bestimmten Tons gewiß hier um so mehr seinen unverkennbar großen Nutzen, da doch gewiß eine sehr beträchtliche Anzahl von Liebhabern dieser Sprache nach dem erhaltenen mündlichen Unterricht wenig Gelegenheit mehr haben, durch Umgang sich den wahren Ton zu behalten.

Es geht uns ja mit den übrigen Sinnen auch nicht besser; wenn wir die großen Scenen der Natur, die verschiedenen Schönheiten des Lichtes und des Scheins der Sonne und des Mondes, die mannichfaltigen Farbenmischungen der Berge und Ebnen, das Schlagen und Thürmen des Waßers ꝛc. nicht selbst durch unsre Sinne aufgenommen und kennen gelernt haben, so werden wir die ganze Vorstellung davon weder durch den Buchstaben des Dichters, noch durch die Farben des Mahlers erhalten; kennen wir aber schon diese Dinge, bringen wir schon die lebendige Vorstellung mit zum Lesen des Buches und zum Anschauen des Gemähldes, so wird man sie auch gern in sich durch den Dichter und Mahler wieder erwecken laßen, wir können denselben alsdann nachhelfen.

Der teutschen Sprache ist es aber auch wegen ihrer ursprünglichen Verwandschaft mit der englischen Sprache leichter und mehr möglich als einer andern Sprache, durch sein Alphabet den englischen Ton anzugeben. Blair *) sagt daher auch, der teutsche Dialect ist die Basis unsrer jetzigen Aussprache.

II) Sheridans Grundsätze der englischen Aussprache.

Erster Abschnitt.

Von den einfachen Lauten.

Das englische Alphabet besteht aus sechs und zwanzig Buchstaben,

a b c d e f g h i j k l m n o p q r s t u v w x y z.

Indessen stellt dieses Alphabet auf keine Weise die einfachen Laute der englischen Sprache vor, da sich viele einfache Laute darunter befinden, welche nicht durch Buchstaben angegeben werden können. Unter den Consonanten sind zwey überflüßig; *c* und *q*; denn c hat entweder den Laut von *k* oder *s*; und *q* den Laut des *k* vor einem *u*, wenn das *u*, einen andern Vocal in der nehmlichen Sylbe noch nach sich hat. Zwey sind Bezeichnungen von zusammengesezten Lauten; *j* steht statt dzh; und *x* statt ks oder gz. Und *h* ist gar kein Buchstabe, sondern bloß eine Bezeichnung der Aspiration.

Unter den Vocalen sind zwey, nemlich *i*, und *u*, welche wie Doppellaute ausgesprochen werden; und die einzigen Laute, wo man wirkliche reine Vocale hört, sind *a*, *e*, und *o*. Wenn man nun auf solche obengedachte Weise jene fünf Consonante und zwey Vocale abzieht, so bleiben nur neunzehn Buchstaben, um alle die einfachen Laute der englischen Sprache anzugeben, deren gleichwohl in der That acht und zwanzig sind; folglich bedarf diese Sprache noch neun Buchstaben, wenn ein jeder einfache Laut ein besonderes Zeichen für sich haben soll. Die Ursache dieses Mangels liegt darinn, daß bey dem Wiederaufblühen der Wissenschaften für die englische Sprache das lateinische Alphabet angenommen wurde, von welchen beynahe in ganz Europa Gebrauch gemacht worden, ob es gleich auf keine Weise der englischen Sprache um deswillen angemessen war, weil diese Sprache eine sehr große Menge einfacher Laute enthielt, welche sich in der alten lateinischen Sprache nicht fanden. Um nun aber diesem Mangel, welcher in dem angenommenen Alphabet sich fand, abzuhelfen, bediente man sich in jenen Zeiten der Unwissenheit so ungeschickter Mittel, und von jener Zeit an bis zu der unsrigen riß durch die Vernachläßigung fester Grundsätze und durch das Bequemen nach der Laune und der Mode der Zeiten eine solche Verschiedenheit und Ungleichheit jener ursprünglichen, der lateinischen Sprache un-

bekannten englischen Laute ein, daß eine richtige Aussprache der Worte beym Lesen selbst für die gut erzogenen Inländer eine Arbeit wurde, welche unendliche Zeit und Mühe kostete; dem Ausländer aber wurde es ganz unmöglich gemächt, durch den Unterricht, der bißher in Büchern gegeben worden, zur richtigen Aussprache zu gelangen.

Das einzige Ziel nun, das sich bey diesem Werke gesteckt worden ist, besteht eben darinn, einen Leitfaden durch diesen so verwickelten Irrgarten zu reichen, und dadurch jeden, der die Mühe nicht scheut, sich die hier festgesezten Grundsätze wohl bekannt zu machen, in den Stand zu setzen, eine richtige Aussprache der englischen Sprache sich zu verschaffen.

Zu einem solchen Zwecke ist es daher zuvörderst nothwendig, die Anzahl der einfachen Laute der englischen Sprache festzusetzen. Es folgen zuerst die Vocale.

Abriß der Vocalen.

a. hăt (hätt) hāte (heht) hăll (hahl)

e. bĕt (bett) bēar (behr) bēer (bihr)

i. fĭt (fitt) fīght (feiht) fīeld (fihld)

o. nŏt (natt) nōte (noht) nōose (nuhs)

u. bŭt (bott) būsh (busch) blūe (bliuh)

y. love-lў (lovvli) lўe (lei).

Hier ist nun nothwendig, daß man zur leichten und klaren Einsicht dessen, was hier noch über die Vocale vorkommen wird, den so eben gegebenen Abriß auswendig lernt, um in Stande zu seyn, ihn sogleich in der Ordnung, in welcher die Wörter gestellt sind, wiederholen zu können; als

hăt (hätt) hāte (heht) hăll (hahl)

bĕt (bett) bēar (behr) u. s. w.

Dieser Abriß zeigt, daß jeder Vocal drey verschiedne Laute hat; und sie sind übrigens um deswillen auf diese Weise classificirt worden, um sie nachher durch die Benennungen von Eins, Zwey, und Drey bey den einzelnen Fällen angeben zu können.

Bey der ersten Uebersicht dieses Abrisses könnte man leicht sich einbilden, daß die englische Sprache nicht weniger als siebenzehn Töne der Vocalen besitze; allein bey näherer Prüfung entdeckt man, daß einige Wiederholungen eines und desselbigen Lauts sich darunter finden, welche nur verschiedne Bezeichnungen erhalten haben. So ist der zweyte Laut des a

und des *e*, wie in hâte (hęht) bæar (behr) ganz einerley. Der dritte Laut in *e* und *i*, bēer, (bihr), fīeld (fihld) ist ebenfalls einerley Laut. Der Laut des *o* in nŏt (natt) ist blos der kurze Laut des å in hall. Der zweyte Laut des ů in bůsh (busch) ist nichts anders als der kurze Laut des ō in noose. Der zweyte Laut des i in fight (feiht) und der dritte Laut des u in cūbe, (kiuhb), sind nicht einfache Laute, sondern Doppellaute. Und was noch die zwey Laute des y betrift, und zwar den ersten Laut, welchen man in der lezten Sylbe von lovely bemerkt, so ist dieser auch nichts anders als der kurze Laut des ē in beer, und der zweyte Laut in lye ist mit dem ī in fight einerley.

Wenn man nun diese acht Wiederholungen abrechnet, so bleiben nur neun einfache Vocale übrig, nemlich:

ă	å	ā	ē
hall (hahl)	hat (hått)	hate (hęht)	beer (bihr)
ŏ	ō	ĕ	ĭ	ŭ
note (noht)	noose (nuhs)	bet (bett)	fit (fitt)	but (bott)

Anzahl der einfachen Laute der Consonanten.

Derselben sind neunzehn, und zwar:
eb, ed, ef, eg, ek, el, em, en, ep, er, es, et, ev, ez, eth, esh, ezh, ing.

Von der Zahl der Buchstaben, welche in dem lateinischen Alphabet die einfachen Laute andeuten, müssen fünf als unschicklich ausgeschlossen werden: zwey derselben, c und q, sind überflüßig, denn c wird entweder wie ein k oder wie ein s ausgesprochen; wie ein k in card; wie ein s in cease: q hat den Laut des k alsdann, wenn es vor einem Doppellaut, dessen erster Vocal ein u ist, vorhergeht, als in quality. H ist gar kein Buchstabe, denn er giebt keinen articulirten Laut, und ist blos ein merklicher Hauch oder eine Aspiration: zwey bezeichnen zusammengesezte, und keine einfachen Laute; j hat den Laut wie dzh, als ezh, edzh; james dzhames (dschehm's); x hat den Laut von ks oder gz; ks in excel (eksell) gz, in example.

Die lezten fünf Consonante des Englischen Alphabets, so wie sie oben aufgezählt worden, sind durch zwey Buchstaben angedeutet worden, und dies ist auch die Ursache, warum diese Laute ehehin von den englischen Sprachlehrern als zusammengesezte Laute angesehen wurden, ob sie gleich in der That so einfach wie die übrigen sind. Der wahre Umstand ist jedoch dieser: die römische Sprache hatte diese Laute gar nicht, und folglich hatte sie auch in ihrem Alphabet keine Buchstaben, um diese Laute zu bezeichnen. Den Laut des eth, oder das grie-

chiſche theta, hat man auch wirklich mit noch einigen Wörtern aus dieſer Sprache, als theatrum, theologia u. ſ. w. herüber in die Engliſche Sprache genommen; da man dennoch die griechiſchen Buchſtaben nicht auch in das engliſche Alphabet einführen könnte, ſo verfiel man auf das Mittel, daß man zur Bezeichnung dieſes Lauts das h., das Merkmal der Aſpiration, mit einem t verband, und dieſes Hülfsmittels hat man ſich auch hier bedient; um dren von jenen Lauten zu bezeichnen; den Laut des tſh, wie in dem Worte tſhin; des th, wie in then; und des ſh, wie in ſhall. Dem vierten Laut, ezh, hat man noch keine beſondre Bezeichnung gegeben, weil er bald durch ein bloſes z, wie in azure, bald durch ein ſ, wie in oſier vorgeſtellt wird. Der einfache Laut ing wird einſtimmig durch die Verbindung des n und g, als ſing, ring u. ſ. w. bezeichnet.

Außerdem hat das Römiſche Alphabet noch zwey Buchſtaben, y und w, deren Weſen und Gebrauch von den engliſchen Sprachlehrern gänzlich mißverſtandrn worden ſind, wie ſich ſolches bey der Lehre von den Doppellauten ergeben wird. Der vorzügliche Gebrauch dieſer Buchſtaben beſteht darinn, daß ſie die kurzen Laute von *ee* und *oo*, bey der Bildung der Doppellaute bezeichnen ſollen; ſie ſollten daher auch hiernach benennet werden. Das Ganze des Engliſchen Alphabets, in Rückſicht ſowohl der Laute als auch der Buchſtaben, kan in folgendem Abriß überſehen werden.

Vocale.

a	ā	ä	ē	ō

Wenn man dieſe lezten Buchſtaben auf dieſe Weiſe ausſpricht, ſo wird durch ihre Benennungen ihre Natur auch ausgedruckt. Es iſt auch ein Vocal vor die andern Conſonanten geſezt wor-

den, damit sie alle auf diese Weise ausgesprochen werden; eine Weise, die zwar dem bißher gewöhnlichen Gebrauche nicht entspricht, wovon aber weiter unten der Grund angegeben werden soll.

Zweyter Abschnitt.

Von der Natur und Bildung der einfachen Laute.

Zuerst von den Vocalen; welche in lange und kurze getheilet werden. Die ersten sechs sind von der ersten, und die drey darauf folgenden von der zweyten Art. Wenn die ersten lange Vocale genennet werden, so sind sie darum nicht nothwendig lange, sondern es heißt dies soviel, es sind Laute, die nach Belieben verlängert werden können, ob sie gleich auch kurz gemacht werden können; und streng genommen, sollten sie daher eigentlich zweifelhafte oder ungewisse Laute genennet werden.

Die sechs langen Vocale.

hâll, hât, hâte, bêer, nôte, nôose.

Wenn man diese Vocale in dieser Ordnung ausspricht, so werden wir eine richtige und regelmäßige Stufenleiter gewahr, durch welche die Stimme bey der Bildung dieser Laute geht. â ist der volleste Laut, verlangt die größte Oefnung des Mundes, und die Stimme berührt den Theil des Gaumens, der zunächst an dem Gange sich befindet, aus welchem die Stimme hervorkömmt: â bildet sich durch eine gemäße mindere Oefnung und eine schnellere Erhebung der Stimme: ê in gleichem noch schneller; Bey dem Laute des ê ist der Mund beynahe geschlossen, und die Erhebung der Stimme findet sich nah an den Zähnen. Dies sind die einzigen langen Vocale, welche innerhalb des Mundes gebildet werden. Nach diesen wird der Siz der Articulation durch die Lippen befördert; ô wird durch ein geringes Ausstossen von den Lippen in der Gestalt gebildet, die dem circelförmigen Zeichen ähnelt, durch welches der Ton vorgestellt wird; und ô wird noch mehr durch die Lippen hervor gebracht, und der Ton durch eine Oefnung, die mehr von länglichter Art ist, hervorgestossen. Wer daher nur eine leichte Aufmerksamkeit auf die Wiederholung der Vocale in dieser Ordnung, zu verwenden vermag, der wird eine regelmässige und Stufenweise geschehende Erhebung der Stimme, gewahr werden, als â â â ê ô ô. Die drey lezten Selbstlaute, die man in den Wörtern bêt, fit, bût, hôrt, sind ihrer Natur nach kurz, weil sie nicht verlängert werden können; Ebendeswegen

können sie auch nicht leicht allein und für sich ausgesprochen werden, sondern ihre wahren Laute können nur in Sylben, worinn sie mit darauf folgenden Consonanten verbunden sind, deutlich gemacht werden.

Von der Natur und Bildung der Consonanten.

Die Consonante theilen sich in zwey Classen, stumme, und halbselbstlaute. Die stummen sind diejenigen, deren Laute nicht verlängert werden können; die Halbselbstlaute können dagegen nach Belieben ihren Ton ausdehnen; sie nehmen etwas von der Natur der Vocalen an, nach welchen sie auch benennet worden. Es giebt sechs stumme Consonante, eb, ed, eg, ek, ep, et, und drenzehn halbselbstlaute, ef, el, em, en, er, es, ev, ez, etſi, eth, esh; ezh, ing.

Die stummen kan man wieder in reine und unreine abtheilen. Die Laute der reinen können auf keine Weise gedehnt oder verlängert werden, und diese sind ek, ep, et. Die Laute der unreinen können gedehnt werden, jedoch nur sehr wenig, und hieher gehören, eb, ed, eg.

Die Halb-Vocale sind wieder in Stimm- und Hauchlaute abzutheilen. Die Stimmlaute werden durch die Stimme, die Hauchlaute aber durch den Hauch gebildet, Es sind neun Stimmlaute, el, em, en, er, ev, ez. eth, ezh, ing. Die Hauchlaute sind ef, es, etſi, esh. Die Stimm-Halb-Vocale sind wieder in reine und unreine abzutheilen. Die reinen werden allein durch die Stimme hervorgebracht; die unreinen aber entstehen durch eine Vermischung des Hauchs mit der Stimme. Es giebt hier fünf reine, el, em, en, er, ing; Vier unreine, ev, ez, eth, ezh.

Um nun die Weise ihrer Bildung kennen zu lernen, ist es nöthig, sie in besondere Classen zu vertheilen, und die Classen sind nach den verschiedenen Orten, wo sie gebildet werden, nemlich den Lippen, den Zähnen, dem Gaumen, der Nase, zu bestimmen; daher entstehen nun die Benennungen Lippenlaute, Zahnlaute, Gaumenlaute und Nasenlaute.

Lippenlaute sind vier, eb, ep, ef, ev.
Zahnlaute acht, ed, et, etſi, eth, ez, es, esh, ezh.
Gaumenlaute vier, eg, ek, el, er.
Nasenlaute drey, em, en, ing.

Eb und ep werden durch eine und dieselbige Bewegung der Lippen, nemlich durch das Schließen der Lippen und Auffangen der Stimme, hervorgebracht; die einzige Verschiedenheit da-

bey iſt dies, daß bey der Bildung des Eb die Lippen Anfangs blos einander ſanft berühren, ſie ſollen den Ausgang einiger Laute nicht ganz verhindern, und ſie ſchließen ſich bald nachher wenn die Stimme ganz aufgefangen iſt: Anſtatt bey der Bildung des Ep, die Lippen auf einmal ſo ſtark zuſammen gedruckt werden, als wenn der Ausgang des Lauts verhindert werden ſollte. Dieſe zwey Laute ſind die einzigen urſprünglichen Lippen Hauptlaute; das heißt, ſie werden allein durch die Lippen gebildet; die andern beyden ſind theils Lippen-, theils Zahnlaute; das heißt, ſie werden durch das Anlegen der Unterlippe an die Obern Zähne, als ef, ev, hervorgebracht. Wobey dieſes zu bemerken iſt, daß dieſe zwey Buchſtaben durch die nemliche Stellung der Sprachorgane gebildet werden, nur mit dem einzigen Unterſchiede, daß ev durch eine Vermiſchung der Stimme und des Hauchs, ef aber durch den Hauch allein hervorgebracht wird.

Hierauf folgen der Ordnung nach die Zahnlaute, weil der Sitz ihrer Bildung zunächſt an den Lippen ſich befindet. Bey der Hervorbringung des ed und des et wird die Spitze der Zunge wider das obere Zahnfleiſch gedruckt, wobey beynahe die Zähne berührt werden; und hier iſt kein anderer Unterſchied unter ihnen, als derjenige, deßen bey den Lippenlauten eb und ep gedacht worden; nemlich, daß bey dem andern eine Dehnung, Fortſetzung des Lauts eintritt, die bey dem andern wegfällt. Bey der Bildung des ed, berührt die Zunge nur Anfangs ſanft das Zahnfleiſch, und wird ſtufenweiſe näher angedrückt, bis der Laut ganz verengt wird; anſtatt daß bey der Bildung des et, die Zunge auf einmal ſo ſtark und nahe an den nemlichen Theil gedrückt wird, daß der Laut ſogleich abgeſchnitten wird.

Et-ſi und eth werden hervorgebracht, wenn die Spitze der Zunge zwiſchen die Zähne gelegt, und wider die obern Zähne angedrückt wird; und auch dieſe unterſcheiden ſich wiederum unter einander, wie ev und ef, dadurch, daß der eine blos durch den Hauch, der andere durch Hauch und Stimme zugleich gebildet wird.

Els und ez werden auf einerley Weiſe hervorgebracht: Man muß nemlich die Spitze der Zunge wieder das obere Zahnfleiſch kehren, doch ſo daß es faſt nicht berühret wird; und wenn auf dieſe Weiſe der Hauch und die Stimme durch das ſcharfe End der Zunge abgeſchnitten und durch die enge Oeffnung, welche ſich zwiſchen der Zunge und dem Zahnfleiſch befindet, hervorgelaßen werden, ſo entſtehen alsdann bey dem einen der ziſchende und bey dem andern der ſauſende Laut. Hier

liegt also wieder, wie bey dem eth etſi der einzige Unterſchied darinn, daß ez durch Hauch und Stimme, els aber nur durch die Stimme allein hervorgebracht werden.

Esh und Ezh bilden ſich, wenn die Zunge gegen die Zähne hervorgeſtoßen wird, alß wenn ſie ſie berühren wollte; und da auf dieſe Weiſe der Hauch und die Stimme durch eine weitere Oeffnung gehen, und wegen der gleichen Lage nicht abgeſchnitten werden, ſo bringen ſie einen nicht ſo ſcharfen Laut, wie in els und ez hervor. Der nemliche Unterſchied tritt alſo auch hier wieder ein; denn beyde werden durch eine gleiche Lage der Sprachorganen gebildet, nur ezh vermittelſt der Stimme und des Hauches, esh aber vermittelſt des Hauches allein.

Genau genommen giebt es nur zwey Zahnlaute, nemlich eth und etſi; und dieſe bringt man hervor, wenn man die Zunge an die obern Zähne anlegt, welche bey der Bildung aller übrigen Laute nicht ſo unmittelbar beſchäfftigt ſind; da nun der Siz der Bildung jener Laute den Zähnen ſo nahe iſt, ſo haben ſie auch den Namen Zahnlaute erhalten, um ſie dadurch von den Lauten zu unterſcheiden, die ihren Siz weiter zurück gegen den Gaumen zu haben, und daher auch Gaumenlaute genennt werden.

Zu den Gaumenlauten gehören el und er, deren Bildung ein wenig hinter der Stelle wo ed und et ſich bilden, bewürkt wird. El bildet ſich durch eine gelinde Anlegung der Zungenſpize an den obern Theil des Mundes ein wenig hinter dem Siz des ed. Das Andrücken muß ſo ſanft, als es nur möglich iſt, geſchehen, damit der Laut nicht aufgehalten wird; und in dieſer Lage gleitet die Stimme gelinde über die Stellen der Zunge, welche in einer horizontalen Lage ſich befinden, in einem gleichen Maas durch den Mund. *Er* wird durch eine zitternde Bewegung der Zungenſpize zwiſchen dem obern und untern Zahnfleiſch hervorgebracht, ohne daß jedoch das eine und das andere berührt wird, und auch ohngefehr in der nemlichen Entfernung von den Zähnen, wo el gebildet wird.

Weiter zurück gegen den Gaumen zu werden *eg* und *ek* dadurch hervorgebracht, daß man die Mitte der Zunge ſo erhebt alß ſollte ſie den obern Theil des Mundes berühren; und der einizge Unterſchied beruhet darinn, daß bey *eg* die Zunge im Anfange nicht ſo eng angedrückt wird, um den Laut dadurch auf einige kurze Zeit zu dehnen; und daß bey ek die Stimme gänzlich und zwar auf die nemliche Weiſe aufgehalten wird, wie bey der Bildung des ed und et.

Die drey Hauptlaute, *em*, *en*, *ing*, machen die leżte Claſſe aus, welche Naſenlaute genennet werden, weil der Laut durch die Naſe geht. *Em* bildet ſich, wenn die Lippen beynahe auf

die nemliche Weiſe und in dem Grade, wie bey *eb*, geſchloßen werden, nur mit dem einzigen Unterſchiede, daß die Stimme, die bey den Lippen aufgehalten wird, den Gang durch die Naſe offen hat.

Die Bildung des *Em* geſchieht beynahe an der nemlichen Stelle und durch eine gleiche Biegung der Organen wie bey *el*; nur hat hier die Zunge mehr dabey zu thun, welche näher an den obern Theil des Mundes angelegt wird, gleichſam um die Stimme vom Ausgang durch den Mund zurückzuhalten, und den größern Theil der Stimme zu nöthigen, zurück durch die Naſe zu gehen.

Hinter dieſen und beynahe an der nemlichen Stelle der Sprachorgane, wie bey *eg*, wird der Laut *ing* hervorgebracht; man erhebt nemlich die Mitte der Zunge zu einer gelinden Berührung des obern Theiles des Mundes, um gleichſam dieſen Theil der Stimme durch den Mund ausgehen zu laßen, den übrigen Theil der Stimme aber zu nöthigen, ſeinen Gang zurück durch die Naſe zu nehmen.

Es folgt nun hier zur leichtern Ueberſicht ein Abriß des ganzen Alphabets nach den angegebnen Grundſätzen.

Abriß des Alphabets.

Die engliſche Sprache hat 28. einfache Laute.

9. Vocale ă ĭ ā ē ō ŏ ĕ ĭ ŭ
hall, hat, hate, beer, note, nooſe, bet, ſit, but.
w y

Dritter Abſchnitt.

Von den Doppellauten.

Nach geendigter Prüfung der einfachen Laute der engliſchen Sprache, gehen wir nun zu den Doppellauten über. Unter dieſen Doppellauten giebt es zwey, welche gewöhnlich vor einfache Laute gelten, weil ſie meiſtentheils mit einzelnen Buchſtaben bezeichnet werden, und dieſe ſind i und ů, deren Laut ſich in fight (feiht) und blůe (bliuh) findet. Dieſe ſind in der That wahre Doppellaute. Der Laut des i iſt aus dem vollſten Vocale, dem å und dem lindeſten Vocale, dem é zuſammen geſetzt, erſterer wird durch die weiteſte und letzterer durch die kleinſte Oeffnung des Mundes bewürkt. Wenn wir auf die Art und Weiſe Acht geben, wie dieſer Laut ſich bildet, ſo finden wir, daß der Mund ſich im Anfange in dem nemlichen Grade öffnet, und ſich in der nemlichen Lage befindet, alß wenn der Laut des å hervorgehen ſollte; allein noch ehe als die Stimme über die Lippen hervor gehen kan, ſo zieht ſich der untere Theil des Mundes an den obern in der nemlichen Stellung alß wenn der Hülfslaut é ausgeſprochen werden ſollte, und indem nun der volle Laut durch einen gelindern aufgehalten und mit dieſem verbunden wird, ſo entſteht ein dritter Laut, der verſchieden von beyden und eben der Doppellaut i (ei) iſt.

Der Doppellaut ů (iu) iſt aus den Lauten das é und ô zuſammengeſetzt; der erſtere Laut wird ſo ſchnell ausgeſprochen und fällt ſo ſtark auf den Laut des ô, daß ſein eigner, unterſchiedner Laut nicht gehört wird; und auf dieſe Weiſe bildet ſich ein dritter Laut, oder dieſer Doppellaut entſteht aus der Verbindung jener zwey Vocale.

Der Doppellaut oi oder oy wird durch eine gleiche Verbindung der nemlichen Hülfslaute wie bey i hervorgebracht; nemlich å (ah) é (ih); wobey nur dieſer Unterſchied noch eintritt, daß der erſte Vocal å, auf dem die Stimme ruht, deut-

lich gehört wird, ehe sein Laut durch die Verbindung mit dem zweyten Vocal ĕ (ih) verändert wird; wie oi, noiſe, (nahihs.)

Der Doppellaut ow oder ou entſteht durch die Laute ă und ŏ; und wird beynahe auf die nemliche Weiſe wie ĭ gemacht; der Mund befindet sich im Anfange in der Lage, alß wenn er ă ausſprechen wollte, allein ehe der Laut noch vollendet iſt, ſo wird durch eine Bewegung des untern Theils des Mundes und der Lippen als wenn ſie den Laut ŏ geben wollten, der erſte Laut des ă vertrieben und mit dem letztern Laut ŏ vermiſcht, woraus alsdann der Doppellaut ou oder ow entſteht, wie in thou, (thau), now (nau).

Alle übrigen Doppellaute werden durch die kurzen Laute des ŏ und des ĕ hervorgebracht und durch die Buchſtaben *w* und *y* bezeichnet; ſie werden allen übrigen Vocalen vorgeſetzt und mit dieſen verbunden; wie in folgenden Beyſpielen:

w oder ein kurzes ŏ (u). *)

wăſl (wäſſl) wäge (wehdſch) wăll (wahl)
wĕd (wedd) wĕed (wihd)
wĭt (witt) wŏe (woh) wŏo (wuh)
ŭ
word (word).

y oder ein kurzes ĕ.

yărd (jährd) yâre (jehr) yăwl (jahl)
yĕt (jett) yĕield (jihld)
yŏn (jann) yŏke johk) yŏuth (juhth)
yŏung (jong).

Vierter Abſchnitt.

Ueber die richtige Ausſprache des eth, etĥ, ing, w.

Um *eth* richtig auszuſprechen, muß die Zungenſpitze zwiſchen die Zähne, jedoch etwas über dieſelben angelegt, und in dieſer Lage wider die obern Zähne angedrükt werden, ohne die untern Zähne zu berühren; Alsdann muß zu eben der Zeit, da der Laut des Worts z. B. then hervorgehen ſoll, die Zunge hinter die Zähne zurückgezogen werden, worauf der richtige Laut nothwendig erfolgt. Bey der Ausſprache des etĥ müßen die Sprachorganen ſich genau in der nemlichen Lage befinden, allein ehe die Zunge ſich zurückzieht, muß, ſtatt der Stimme, blos ein

*) Man hört beym Ausſprechen auch nicht ganz unſer deutſches w, ſondern eine Miſchung von u und w, es iſt nicht ganz uäſſt und nicht ganz wäſſt, doch kömmt das letztere etwas näher.

Hauch ausgelaßen werden, welches sodann eben so gewiß den laut z. B. in thin hervorbringt

Wenn diese laute ein Wort oder eine Sylbe endigen, wie in den Wörtern breathe, breath, so muß sogleich nach dem Aussprechen der vorhergehenden Buchstaben bey dem Endigen des Worts die Zungenspitze an die obern Zähne, wie schon die Anleitung gegeben worden, gelegt werden; Bey der Aussprache des Wortes breathe ist die Stimme biß zum Ende zu dehnen; hingegen bey dem Worte breath wird die Stimme bey dem Vocal abgeschnitten und der Consonant th wird allein durch den Hauch gebildet. In beyden Fällen hilft es, wenn die Zunge nach der Bildung des Buchstabens noch einige Zeit in der alten Lage bleibt, und bey dem ersten Worte den laut der Stimme und bey dem letzten Worte den laut des Hauchs noch forthält, biß durch Uebung die laute leicht hervorgebracht werden können.

Der Consonant, der durch *ing* bezeichnet wird, ist vielleicht der englischen Sprache ganz eigen; und um ihn hervorzubringen muß die Mitte der Zunge erhoben, mit ihr der obere Theil des Mundes sanft berührt werden, wie bey dem Aussprechen der Nasen-Vocalen: es gleicht dieser laut dem französischen laut im Worte dent.

Der laut des englischen Buchstaben *w* entspricht genau dem laut des französischen Doppellauts *ou*; und so hat das englische Pronomen *we* einen ganz gleichen laut mit dem französischen Worte *oui*; allein auch dies kömmt nicht ganz mit dem teutschen ui überein, und kan daher mit dem teutschen nicht ganz angegeben werden.

Außer dem bißher beschriebenen giebt es noch eine sehr große Verschiedenheit der Zusammensetzungen der Vocalen, welche auf eine sehr unschickliche Weise von den Sprachlehrern Doppellaute genennet werden, da sie doch im Grunde nur verschiedne Weisen sind, die nemlichen Töne der Vocalen anzugeben. Um diese nun von den wahren Doppellauten genau zu unterscheiden, erlaubt sich Sheridan ein neues Wort zu müntzen, und nennt sie Digraphen, oder Doppelgeschriebne.

Fünfter Abschnitt.

Von dem Gebrauch und Mißbrauch der Buchstaben bey dem Buchstabieren und der Zeichnung der Worte.

Wenn geschriebne Worte als Zeichen der laute betrachtet werden, so müßen folgende vier Regeln genau befolget werden,

sonst wird niemals der Laut dem Zeichen genau entsprechen.

1) Kein Buchstabe darf in einem Worte eine Stelle finden, der nicht ausgesprochen wird.
2) Jeder deutliche einfache Laut muß einen deutlichen Buchstaben zu seiner alleinigen Bezeichnung haben.
3) Der nemliche Buchstabe darf niemals als Zeichen verschiedner Laute gebraucht werden.
4) Alle zusammengesetzte Laute müßen nur durch solche Buchstaben angedeutet und vorgestellet werden, die, wenn sie nach den in dem Alphabet erhaltenen Namen ausgesprochen werden natürlich und nothwendig jene Laute hervorbringen.

Diese Regeln sind in den zwey mit Recht berühmten Sprachen des alten Griechenlandes und Roms genau beobachtet worden; daher braucht man nur das Alphabet dieser Sprachen und die Art der Zusammensetzung der Buchstaben, Sylben und Worte sich bekannt gemacht zu haben, um in Stande zu seyn, ohne weitere Hülfe von Regeln oder Sprachmeistern sie beym lesen richtig auszusprechen; und so reicht eine Uebung von wenig Wochen hin, um in dieser Kunst eingeweyht zu seyn. Dagegen werden nun alle jene Regeln in der Englischen Sprache so häufig verletzt, oder vielmehr sie werden in der That so ganz außer aller Acht gelassen, daß wenig oder gar keine Erleichterung für die Erlernung der Aussprache aus den Büchern zu erhalten ist, und die Kunst zu lesen wird eine Arbeit vieler Jahre.

Dies ist in der That der Zustand der englischen Schriftsprache. Die dunkelsten Hieroglyphen, oder die schwersten Ziffern, die die menschliche Kunst bißher ersann, waren nicht besser ausgedacht, um die Gedanken derer, welche sich ihrer bedienten, vor denen, die den Schlüßel dazu nicht hatten, zu verbergen, alß die Art des Englischen Buchstabierens vermag, die wahre Aussprache der Worte allen denen zu verbergen, die nicht zu den wenigen, wohl erzognen Inländern gehören.

Die Urquelle davon liegt, wie schon erinnert worden, in einem mangelhaften Alphabet; indeßen giebt es freylich noch andere Ursachen, welche dazu beytrugen, diese Verwirrung zu vermehren, welche Sheridan in einer besondern Abhandlung über diesen Gegenstand auseinander gesetzt hat *).

Zuvörderst sollen jetzt Beyspiele dieser Unregelmäßigkeit in der Bezeichnung der englischen Laute gegeben werden; denn es ist nothwendig, daß der Schüler aufmerksam darauf gemacht

*) s. Lectures on Elocution, Dissertation, etc. p. 232.

werde, ehe ihm die Regeln ſelbſt vorgelegt werden, die ihn durch dieſes Labyrinth zu einer richtigen Ausſprache leiten ſollen.

Es würde zu läſtig ſeyn, noch mehrere Beyſpiele von der Unbeſtimmtheit in der Bezeichnung der Vocalen anzuführen. Nicht beßer ſieht es aber mit den Engliſchen Conſonanten aus.

B iſt oft ſtumm, wie in — debt, tomb.

C hat drey Laute — k care (kehr) / ſ ceaſe (ſihs) / ſh ſocial (ſoſchál)

F bezeichnet ſeinen Laut durch zwey verſchiedne Verbindungen der Buchſtaben. — ph, philip, (filip) / gh, laugh, (láff).

G hat zwey Laute — gold (gohld) gentle (dſchennt'l).

J hat den nemlichen Laut wie das zweyte G. — joy (dſchai)

S hat vier Laute — i yes (jes) / z roſe (rohß) / ſh paſſion (páſchien) / zh oſier (oſchier)

T hat auch vier Laute — t tell (tell) / ſ ſatiety (ſáſeietl) / ſh nation (nehſch'n) / ch queſtion (queſtſch'n.)

X hat drey Laute — gz example (ekſámp'l) / ks vex (weks) / z zerxes (ſerſſes)

Th hat zwey Laute — then, thin.

Ch hat drey Laute — k chorus (koros) / ſh chaiſe (ſchehs) / ch chair (tſchehr)

Gh hat zwey Laute — g ghoſt (gaſt) / f laugh láff);

und oft iſt es auch ſtumm, wie in daughter (dähter)

Bey dem Anblick einer ſolchen erſtaunlichen Verwirrung und Unbeſtimmtheit in der Bezeichnung der Laute, kann leicht die Vermuthung entſtehen, daß es ein ganz unausführbares Unternehmen ſey, eine richtige engliſche Ausſprache durch die Schriftſprache zu lehren; und dennoch iſt es Sheridan auf eine ſo ganz vorzügliche Weiſe gelungen; nur muß der lernende auch die nöthige Mühe nicht ſcheuen, und die gegebenen Regeln dem Gedächtniße einverleiben; wird dies befolgt, ſo erwirbt man ſich gewiß in kurzer Zeit die richtige engliſche Ausſprache. Um dieſen Entzweck zu erreichen, ſollen zuvörderſt die Regeln beſtimmt werden, nach welchen die Conſonanten auszuſprechen ſind.

B.

B behält immer einen Laut, nur daß es offt ſtumm iſt, und dies iſt es allezeit, wenn es in der nemlichen Sylbe ein t nach ſich hat, wie in debt (dett) doubt (daut); oder wenn es ein m vor ſich hat, wie in tomb (tuhm) dumb (domm); auch in dem Worte ſubtle (ſott'l) wird es nicht gehört.

C.

C iſt ein überflüßiger Buchſtabe, denn er füllt nur die Stelle von k oder ſ aus. Nimmt es ein h nach ſich, ſo hat es ſeinen beſondern Laut, von dem weiter unten gehandelt werden ſoll. Den Laut des k hat es vor den Conſonanten a, o, und u; den Laut des ſ vor e und i. Dieſer Buchſtabe wird alſo auf folgende Weiſe ausgeſprochen:

ca	ce	ci	co	cu
kä (keh)	ſe (ſih)	ſi (ſei)	ko (koh)	kü (kiuh).

Nach den verſchiednen, oben angegebenen Vocalen läßt ſich nun auch eine beſtimmte Regel zur richtigen Ausſprache der verſchiednen Laute annehmen; ausgenommen wenn in der nemlichen Sylbe ein ſ vor dem e geht, von welchem Falle beſonders gehandelt werden ſoll. Wenn in der nemlichen Sylbe ein k nach dem c folgt, ſo iſt das c ganz ohne alle Bedeutung, wie in ſlick, (ſlik) ſack (ſäk) traffick (träfflk). Einen beſondern Laut hat es auch, wenn es anſtatt des ſh ſteht, und den Endungen eous vorgeht; wie in cetaceous, (ſehtehſchos) gracieous, (grehſchos). Bisweilen iſt es auch ſtumm, wie in den Wörtern muſcle (muſſ'l), indict (indelht).

D.

Dieſer Buchſtabe behält immer einen und denſelbigen Laut; Bißweilen, jedoch nicht offt, wird er nicht gehört, z. B. in handkerchief (hänngkertſchif) handſome (häunſam) handſel (hännſel).

F.

F behält ſeinen eigentlichen Laut beſtändig bey, nur in der Partikel of, wo es die Natur des v annimmt, und wie ov (av) ausgeſprochen wird, um es von dem Worte off ſowohl durch den Laut als durch das Buchſtabieren zu unterſcheiden. Ob nun gleich dieſer Buchſtabe, wenn er allein ſteht, ſeinen eigentlichen Laut getreu bleibt, ſo wird er doch offt auch durch zwey ff angedeutet, wie in chaff (tſchäff) ſcoff (ſkaff); bißweilen durch ph, ſowohl beym Anfange als beym Ende der Worte, wie in philoſophy (filoſofi), epitaph (epitäf); und bißweilen auch durch gh, wie in langh (läff) caugh (kaff) wovon ein mehreres an ſeinem Orte.

G.

G hat zwey Laute; der eine ist demselben eigen, wie in gold (guhld); den andern hat es mit dem j gemein, wie in gentle (dschennt'l). Den ersten Laut kan man das harte, den zweyten Laut aber das weiche g nennen. Gleich dem c hat es allezeit seinen ersten oder harten Laut vor den Vocalen a, o, u; seinen zweyten oder weichen Laut hat es gewöhnlich vor e und y; zweifelhaft aber ist es vor i, und kan daher auf keine bestimmte Regel zurückgebracht werden. Demohngeachtet kan man seine Beschaffenheit im Allgemeinen durch Wiederholung folgender Sylben kennen lernen, ga (gá), je (dscheh) gi (gi), go (go), gu (go), jy (dschi).

Vor dem Vocal e, hat es gewöhnlich seinen weichen Laut, ausgenommen gear (gehr) geese (gihs), geld (gelld) und deren abgeleiteten Wörtern; get (gett) und die davon herstammenden Wörter; und seinen harten Laut findet man nur in einigen eigenthümlichen Nahmen, welche aus dem Hebräischen und in Kunstausdrücken, welche aus dem Griechischen herkommen.

Gar nicht wird dieser Buchstabe gehört: 1) wenn er vor einem *m* steht, wie in phlegm (flemm); 2) vor einem *n*, wie in reign (rehn), condign (kandelhn); 3, vor einem *h*, wie in light (leiht), fought (faht); jedoch wird ausgenommen, wenn gh die Eigenschaft des f annimmt, wie in laugh (láff), wovon nachher mehr gehandelt werden soll.

H.

Dieser Buchstabe ist kein Zeichen eines articulirten Lautes, sondern blos ein Zeichen der Aspiration oder ein Anstrengen und Bestreben des Hauches. Dies ist seine einige Eigenschaft, wenn er allein steht, und alle Wörter, die diesen Buchstaben an ihrer Spitze haben, müßen mit einer Anstrengung des Hauches angefangen werden; doch sind davon auszunehmen: heir (ehr), honest (anneft), honour (anner), hospital (aspitál), hostler (astler), hour (aur), humour (iumer), humble (omb'l), humbles (ombl's). Wird es mit c verbunden und also ein ch hervorgebracht, so zeigt es den zusammengesetzten Laut das tsh (tsch) an, als charm (tschárm). Wird es mit t verbunden, so entstehen die beyden ganz eignen Laute then und thin. Wird es mit einem s verbunden, so entsteht der Laut sch, wie in shall (scháll). Ch steht auch statt des k chorus (koros); statt f in philosophy (filosofi); so wie das gh in laugh (láff). In der Verbindung mit g, dient es zum Zeichen, daß das g nicht gehört wird, wie in thought (thaht).

J.

Dieser Buchstabe stellt den zusammengesetzten Laut vor, der aus d und zh, oder dem geschärften z in teutschen aus dem dsch, entsteht, wie in joy (dschäi), joke (dschohk). Dieser Buchstabe ist niemals stumm, und behält unveränderlich seinen Laut.

K.

K behält beständig den nemlichen Laut, der auch durch das harte C vorgestellt wird, wie in king (king) card (kährd). Wenn es vor einem n in der nemlichen Sylbe steht, so wird es nicht gehört, wie in know (noh) knot (natt); überflüßig steht es, wenn es mit einem harten c verbunden wird, wie in lock (lak) stick (stik).

L.

L behält seinen Laut in allen Fällen, und wird nur alsdann verschwiegen, wenn nach demselben in einer Sylbe ein m folgt, wie in balm (bähm), psalm (psähm). In einem einzigen Worte lautet es wie ein r, nemlich colonel wird ausgesprochen kornel.

M.

M behält immer gleichen Laut und wird niemals verschwiegen.

N.

Auch N behält immer seinen gleichen Laut, nur wird es stumm, wenn es in der nemlichen Sylbe nach m steht, wie in hymn (himm), condemn (kandemm).

P.

Dieser Buchstabe behält ebenfalls immer gleichen Laut; nur wenn er mit h verbunden wird, nimmt er die Eigenschaft des f an, wie in philosophy (filosofi).

Q.

Q hat immer die Eigenschaft des k; der Buchstabe q wird auch jederzeit statt des k gesezt, wenn dieser Buchstabe vor einem u zu stehen kömmt, auf welches u noch ein andrer Vocal folgt, wie in quarrel (quarrel oder kwarrel), question (questsch'n oder kwestsch'n), antiquity (äntiquiti oder äntikwiti); hier werden die beyden Vocale in einen Doppellaut zusammen verbunden. In den Wörtern pique (pik), antique (äntick) werden die zwey lezten Vocale stumm, und der Ton des Consonanten k endigt die Sylbe. Q ist übrigens niemals stumm.

R.

Dieser Buchstabe behält immer gleichen Laut, und ist niemals stumm.

S.

S hat vier verschiedne Laute: 1) seinen eignen Laut, wie in so (so), yes (jis); 2) wie z oder das teutsche ß, als in rose, (rohß) 3) wie sh, oder das teutsche sch, als in passion (pásch'n); 4) zh oder das teutsche ssch, als in osier (ohsscher.) Seinen eigenthümlichen Laut, wie das teutsche s, hat es allezeit, wenn es im Anfange des Worts steht, und wenn es ein Wort endigt, und zwar 1) wenn die Wörter sich endigen auf as, ausgenommen die einsylbigen Wörter as (áß), has (háß), was (wahs), und der Plusralis der Nominum, welche sich auf ea endigen, als in fleas (flihs), pleas (plihs) u. s. w. 2) In allen Wörtern, welche sich auf ein doppeltes s endigen, als faultless (fahltleß), depress (depreß), u. s. w. 3) In allen auf is sich endigenden Wörtern, als this (this), tennis (tennis; Ausnahme: das Verbum is (iß), und das Pronomen his (hiß), wo es den Laut des ß hat. 4) In allen auf us und ous sich endigenden Wörtern, als circus (sörkos), genius (dschihnios), cutaneus (kutehnios), nauseous (nahschos.) 5) Wenn in der nemlichen Sylbe dem s einer von den reinstummen Buchstaben k, p, t, oder th und f vorgeht; wie in locks (laks), caps (káps), hats (hátts), baths (báths), scoffs (skaffs).

Den Laut des z oder des teutschen ß hat es: 1) wenn demselben in der nemlichen Sylbe irgend ein anderer Consonant vorgeht, ausser den reinstummen Buchstaben k, p, t, und den zwey geschärften Halbvocalen th und f; als blabs (blábbß), beds (beddß), begs (beghß), bells (bellß), dams (dámmß) u. s. w. 2) Wenn das s ein Wort endigt, vor sich aber den Vocal e hat; als in riches (ritscheß) series (sihrieß;) davon ist jedoch auszunehmen, wenn das vorhergehende e ein bloßes stummes e ist, wie in dates (dehts), cakes (kehks) u. s. w.

Wie ein sh oder teutsches sch, klingt es in allen Wörtern, die sich auf sion endigen, und dem s noch ein Consonant vorhergeht, wie in emulsion (emollsch'n), expansion (ekspánsch'n), dispersion (dispersch'n), u. s. w.

Wie ein zh oder teutsches ssch in der Endung sion, wenn dem s ein Vocal vorgeht; wie in occasion (akkáhsch'n), cohesion (kohihsch'n), incision (insissch'n), explosion (eksplossch'n), confusion (kanfiuhssch'n. Eben so auch in allen Wörtern, welche sich auf sier endigen, als crosier (krohsscher), hosier (hohsscher).

T.

Dieser Buchstabe behält seinen eignen Laut im Anfange der Worte, und am Ende der Sylben. Den Laut des s hat er im Worte satiety (sáseieti). Wie *sh* oder das teutsche sch wird tt ausgesprochen in allen Endungen auf *tion*, als nation

(nehſch'n), ſanction (ſänkſch'n), notion (nohſch'n), u. ſ. w. Geht aber vor dem t ein ſ, ſo erfolgt der Laut von tſh oder das teutſche tſch, welcher gewöhnlich durch ch angezeiget wird, als queſtion (kweſtſch'n), (baſtion) báſtſch'n) u. ſ. w. In den Endungen *tial* wird es wie ein ſch ausgeſprochen, als martial (máhrſchál), nuptial (nopſchál). Geht aber bey ſolchen Endungen dem *t* ein *ſ* vor, ſo erhält es den Laut des engliſchen *ch* oder des teutſchen tſch, als beſtial (beſtſchál), celeſtial (ſeheſtſchál.

V.

V behält immer einen Laut, und wird niemals verſchwiegen.

X.

Dieſer Buchſtabe hat zwey zuſammengeſezte Laute, wie *ks* und wie *gz*. An dem Ende der Wörter hat es jederzeit den Laut ks, wie in vex (weks), tax (täcks).

1) Wenn es in der erſten Sylbe eines Worts ſteht, und den Accent hat: ſo hat es allemal den Laut des *ks* — als ex, erciſe (ekſſerſeis), extricate (ekſtrikeht).

2) Wenn auf das x in der nächſtfolgenden Sylbe ein Conſonant oder ein geſchärftes h folgt: ſo hat es auch den Laut des ks, der Accent mag übrigens liegen, wo er will, als in exculpate (ekſkolpeht), exhibition (ekſhibiſch'n), exhilirate (ekshillireht).

3) Folgt in der nächſten Sylbe auf das x ein Vocal, und der Accent liegt nicht unmittelbar auf der Sylbe; ſo bleibt auch der Laut des ks, wie in executioner (ekſehkiuhſchoner).

4) Liegt aber der Accent unmittelbar auf der folgenden Sylbe, welche mit einem Vocal anfängt, ſo wird der Laut des x in ein gz oder teutſches kſch, welches freylich nicht ganz dem engliſchen gz entſpricht, verwandelt, wie in example (ekſchámp'l,) exalt (ekſchahlt), exiſt (ekſchiſt), exonerate (ekſchonereht) u. ſ. w. Die einzige Ausnahme, die hier ſtatt findet, iſt, daß der Laut gz oder kſch auch auf einigen wenigen abgeleiteten Wörtern dieſer vierten Regel entgegen bleibt, z. B. exemplary (ekſchámplári), exaltation (ekſchahltáhſch'n); dieſe werden nach der vierten Regel ausgeſprochen, obgleich bey dem Worte exemplary der Accent auf der erſten Sylbe, und bey dem Worte exaltation auf der dritten Sylbe ruht.

Z.

Dieſer Buchſtabe kömmt in ſehr wenigen Engliſchen Wörtern vor, da ſtatt deſſelben gewöhnlich das ſ gebraucht wird. Es hat zwey Laute: 1) wie ein ſ, als in razor (rehſer); 2) wie zh oder ſſch, als azure (ehſſchor).

Nachdem alle die Conſonante des engliſchen Alphabets abgehandelt worden, ſo trift die Unterſuchung nun diejenigen einfachen Laute, die keinen eignen Buchſtaben zu ihrer Bezeichnung haben, und daher durch zwey Buchſtaben vorgeſtellt werden.

Th, Thi.

Dieſe zwey verſchiednen Laute werden durch die nemliche Verbindung des t und h bezeichnet. Ihre Natur und Eigenſchaft iſt ſchon hinlänglich auseinandergeſezt worden; daher hier nur noch die richtige Anwendung dieſes Zeichens zu ſeinen zwey verſchiednen Beſtimmungen zu zeigen übrig iſt.

Das thi hat im Anfange der Worte iederzeit ſeinen aſpirirten Laut, und wird daher ganz durch den Hauch gebildet. Ausnahmen ſind: das Pronomen thou (thau), und deſſen abgeleitete Wörter, als thee (thh), them (them), thine (theihn), their (thehr) u. ſ. w. 2) Die folgenden einſylbigen Wörter, than, that, the, their, then, thence, there, this, thither, thou, thy, though, thas; In allen dieſen behält es ſeinen Stimmlaut. Wenn r oder w nachfolgen, ſo hat es allemal den Laut des thi, als thiron, thiwart.

Am Ende der Worte hat thi ſeinen Hauchlaut, jedoch ſind davon ausgenommen: ſheath, beneath, underneath, teeth, booth, ſmooth, ſooth. Die Partikel with hat bißweilen den Hauch, und bißweilen den Stimmlaut. Den Hauchlaut hat ſie vor einem Conſonant, den Stimmlaut vor einem Vocal; als withſtand, without. Das nemliche gilt auch, wenn with nicht zuſammengeſezt, ſondern nur einzeln ſteht; *with* many more, *with* all my heart.

Wenn ein ſtummes e am Ende in der nemlichen Sylbe auf th folgt, ſo hat es allemal den Stimmlaut; als in bathe (behth), breathe (brihth).

Wenn es in der lezten Sylbe mit einem nachfolgenden y ſteht, ſo hat es allemal den Hauchlaut, als ſympathy, healthy; Ausgenommen ſind die Worte wreathy und worthy.

In allen andern Fällen, wo th in den Mittelſylben der Wörter ſich befindet, iſt die allgemeinſte Regel, daß es den Hauchlaut vor dem Conſonanten, und den Stimmlaut vor dem Vocal erhält; Ausnahmen ſind die abgeleiteten und zuſammengeſezten Wörter, welche den Laut ihrer Stammwörter behalten; ſo behält loathſome den urſprünglichen Stimmlaut von loath, obgleich ein Conſonant vorhergehet; und toothing den urſprünglichen Hauchlaut, obgleich ein Vocal vorhergeht.

In wenigen Fällen klingt das th wie im teutſchen als ein bloſes T, als in Thames (thehmes), Thomas (thomás).

Sh.

Sh ist das teutsche sch, wie shall (schäll), wish (wisch); Unveränderlich behält es diesen Laut und ist niemals stumm. Eben der Laut des sch wird aber noch häufig durch andere Buchstaben, als c, t und s angedeutet. C und T werden wie sch ausgesprochen in allen Wörtern, welche sich auf *cial* und *tial* endigen, als social (soschäl), partial (pärschäl;) in den Endungen *cion* und *tion*, als suspicion (ssospisch'n), nation (nehsch'n); in *cious* und *tious*, als capricious (käprischos), contentious (kantenschos); in *ceous*, als cetaceous, (sehtehschor); und in *sion*, wenn noch ein anderes s vorangeht, als impression (impresch'n). Es wird dieser Ton auch durch das *ch* in den Wörtern vorgestellt, welche aus dem Französischen abstammen; als: chevalier, machine.

Zh.

Zh will Sheridan wie das j der Franzosen ausgesprochen haben; wir Teutsche kommen daher dem englischen zh und dem französischen j durch ein gelindes sch am nächsten.

Ng.

Der Laut dieser zusammengesezten Buchstaben ist allezeit am Ende der Worte sich gleich und wird niemals verschwiegen. Folgende Regeln sind hierbey zu bemerken: 1) Wenn ng ein stummes e nach sich hat, so verändert es seinen Laut in einen aus n und j (dsch) zusammengesezten Laut, als in range (rehndsch), strange (strehndsch); 2) wenn einem auf ng sich endigenden Stammwort noch eine Sylbe zugesezt wird, so trägt es gewöhnlich seinen eignen Laut auf die andere Sylbe über, als in hang (hänng), hanger (hännger); wrong (wranng), wronger (wrannger); bißweilen leiht es jedoch den Laut des lezten g in seinem harten Laut der nächsten Sylbe, als long (lanng), longer (lannger); strong (stranng), stronger (strannger); diese zwey Wörter, nebst dem Worte younger (joungger), sind indessen die einzigen Ausnahmen von der gegebenen Regel. Auf gleiche Weise überlassen einige Stammwörter das harte g der lezten Sylbe; hieher gehören anger (ängher), linger (lingher), finger (fingher), canger (kanghер), monger (manghер), samt den davon abstammenden Wörtern, als fishmonger (fischmanghер) u. s. w. 3) Alle Wörter, welche sich auf *nge* endigen, behalten den ersten Laut bey der nachfolgenden Sylbe, die hinzugesezt worden, als range (rehndsch), ranger (rehndscher), strange (strehndsch), stranger (strehndscher), challenge (tschällindsch), challenger (tschällendscher). Alle andere Wörter, die sich auf *ger* endigen, und wo ein *n* vorhergeht, welches die vorstehende

Sylbe endige, erhalten den Laut des gelinden g oder j (dſch), als meſſenger (meſſendſcher), harbinger (härbindſcher).

Von den Conſonanten mit Doppelbuchſtaben oder Digraphen.

Beyſpiele von Conſonanten, wo in der nemlichen Sylbe zwey Buchſtaben dem Auge vorgemahlet werden, und doch nur einer gehöret wird, ſind:

bt	debt	(dett)	doubt	(daut)	b	ſtumm.
ck	crack	(kräk)	attack	(attäk)	c	
gn	ſign	(ſeihn)	malign)	(mälein)	g	
gn	gnat	(nätt)	gnaw	(nah)	g	
gm	ſlegm	(ſlemm)	apothegm	(äpothemm)	g	
kn	knife	(neihf)	know	(noh)	k	
lm	balm	(bähm)	pſalm	(pſämmm)	l	
mb	lamb	(lämm)	limb	(limm)	b	
mn	hymn	(hymin)	contemn	(kantemm	n	
wr	wry	(rei)	wrong	(raing)	w	

Alle dieſe angeführten Buchſtaben ſind beſtändig ſtumm, wenn ſie auf die angegebene Weiſe in einer Sylbe verbunden werden. Außer dieſen aber giebt es noch vier andere Buchſtaben Verbindungen, die zu verſchiednen Zwecken gebraucht werden; und dieſe ſind *ſc*, *ch*, *gh*, und *wh*.

Sc.

Dieſe Zuſammenſetzung hat bißweilen den Laut eines bloſen ſ, wie ſcene (ſihn): bißweilen wie ein ſk, als in ſcoff (ſkaff). Eben die Regel, welche bereits zur richtigen Ausſprache des c vor verſchiednen Vocalen feſtgeſezt worden iſt, findet auch hier ihre Anwendung, wenn man nur ein ſ vorſezt.

kä	(keh)	ſë	(ſih)	ſï	(ſei)	kö	(koh)	kü	(kiuh)
ſkä	(ſkeh)	ſë	(ſih)	ſï	(ſei)	ſkö	(ſkoh)	ſkü	(ſkiuh)

Das c wird vor e und i verſchwiegen, ausgenommen in dem Worte ſceptic (ſkeptik) und deſſen abſtammenden Wörtern.

Ch.

Ch wird auf drey verſchiedne Arten ausgeſprochen, die ſich in folgenden drey Worten finden, charm (tſchährm), chorus (koros), chivalry (ſchiwälri). Der 1ſte Laut iſt zuſammengeſezt aus tſch, der 2te Laut iſt der des k, und der 3te Laut der des ſch.

Der erſte oder aus tſch zuſammengeſezte Laut hat gewöhnlich in allen Engliſchen Wörtern vor den Vocalen ſtatt.

Der zweyte Laut gehört für die eigenthümlichen Namen und für die aus dem Griechiſchen herkommenden Kunſtwörter.

Der dritte Laut kömmt endlich den Kunſtausdrücken und einigen wenigen andern Wörtern zu, welche von dem Franzöſiſchen abſtammen.

k	ſh
chamelion	chagrin
chamomile	chamois
chaos	champaign (wine)
character	champignon
chimera	chandelier
chirurgier	chevalier
choler	chicane
cholic	chivalry
chord	chaiſe
chorus	chamade
chyle	chancre.
chymiſtry	
chalybeate	
chambrel	
chamlet	
chart	
choir	

Alle auf ch ſich endigenden Wörter haben allgemein den Laut des tſh (tſch); wovon jedoch folgende ausgenommen ſind: ack (ehk) und die davon abſtammenden Wörter, als headack (heddehk) u. ſ. w.

Lilach, maſlich, diſtich, heniſtich, conch, anarch, monarch, tetrarch, hereſiarch, eunuch, loch, ſtomach; in allen dieſen Wörtern klingt das ch wie k, in yacht wird das ch ganz verſchwiegen, und das Wort jat ausgeſprochen.

Gh.

Gh lautet 1) wie das harte g, als in ghoſt (ghoſt). 2) Wie f, als in laugh (läff). 3) Ganz ſtumm, wie in light (leiht).

Wie das harte g klingt es am Anfange aller Worte. Verſchwiegen wird es am Ende der Wörter und Sylben, als in high (heih), neigh (neh), daugh-ter (dahter), jedoch ſind davon diejenigen Wörter ausgenommen, welche den Laut des f annehmen, als in den folgenden cough (kaff), chough (tſchoff), enough (ehnof), laugh (läff), rough (roff), tough (toff). Einen beſondern Laut haben folgende, hiccough (hikkop), ſhough (ſchak), lough (lak), bligh (bleiht).

Wh.

Wh hat theils blos die Eigenſchaft des h, wie in who (hu), wo das w ganz überflüßig iſt, oder es bildet einen Dopt

pellaut mit dem Hülfslaut, der auf das h folgt, deſſen Hauchlaut dem w vorangehen muß, wie in when, welches auszuſprechen iſt, als wenn es geſchrieben wäre hoen (huen).

Da bey allen Lauten von dieſer Art die Aſpiration dem Stimmlaut vorangeht, ſo iſt es ſehr unſchicklich geweſen, beym Schreiben das h nach dem w zu ſetzen, da es doch vor daſſelbe gehört; Sheridan hat in dieſem Ausſprache-Wörterbuche durch die darin gebrauchte Lautbezeichnung dieſem Fehler abgeholfen. Der verſchiedne Gebrauch des wh kan durch eine einfache Regel deutlich gemacht werden, nemlich: daß das w niemals vor dem aſpirirten h ſtehet, ausgenommen bey dem Vocal o; ſteht das w vor irgend einem andern Vocal, ſo bildet das w einen Doppellaut in Verbindung mit dem Hülfslaut, vor welchem der Hauchlaut ſteht; als

whall hȧle (huehl) wheel hȇel (huihl) while hȋle (hueil) why hȳ (huei)

Vor dem Hülfslaut o iſt allemal das w ſtumm, als in

who hȏ (hu) whole hȏle (hohl) whoop hȏp (huhp)

Sechſter Abſchnitt.

Regeln zur Ausſprache der engliſchen Wörter.

Von den einſylbigen Wörtern.

Allgemeine Regel.

Einſylbige Wörter, welche ſich auf einfache Conſonanten oder Hauptlaute endigen, haben ihren Accent oder ihre Stärke auf dieſem Conſonant, und in ſolchen Fällen haben die Vocale den in dem Abriß ihrer Laute angegebenen erſten Laut, mithin

hat (hätt) bet (bett) fit (fitt) not (natt) but (bott)

und dies findet ſtatt, es mag das einſylbige Wort aus 2, 3, 4, oder 5 Buchſtaben beſtehen; als in,

am (ämm), led (ledd), ſpit (ſpitt), ſtrop (ſtrapp), ſtruck (ſtrock)

dieſe Regel jedoch hat allein auf ſolche einſylbige Wörter Anwendung, welche nur einen Vocal in ſich faſſen.

Ausnahmen.

1) Wenn a vor dem r hergeht, ſo ruht der Accent auf dem Vocal; dieſer wird daher lang, ob er gleich den nemlichen Laut behält, als cär (kähr), fär (fähr), b r (bähr). a hat den Laut von ȏ (a) in was (was) wad (wad) und von ȁ (ah) in war (wahr).

2) Die Vocale e und i verändern vor dem r ihren Laut in den des ŭ — als her (hor oder hŏr) sir (sor oder sŏr) stir (stor oder stŏr).

3) Der Vocal e hat den Laut des i in yes (jis); der Vocal o den Laut des ŭ in son (sonn) und das ŭ seinen zweyten Laut in pŭt (putt).

Von den einsylbigen Wörtern, die sich auf mehr als einen Consonant endigen.

Hier ist zuvörderst zu bemerken, daß da, wo der nemliche Consonant doppelt am Ende steht, der vorhergehende Vocal eben die Regeln befolgt, als wenn nur ein Consonant dastünde, denn die nemlichen doppelt stehenden Consonanten haben den Laut nur eines einzigen Consonants: Ausnahmen sind, add, staff, less. Das musikalische Wort bass hat den zweyten Laut z (eh). Sind zwey verschiedne Consonanten am Ende, so tritt auch da nur ein Laut ein, als in back (bäk), stick (stick).

Wenn sich nun aber die einsylbigen Wörter auf zwey oder mehrere Consonanten endigen, deren Laute ausgesprochen werden, so befolgen einige Vocalen die festgesezte Regeln, daß nur ein Consonant gehört wird; andere Vocalen aber haben andere Regeln zur Befolgung vorgeschrieben erhalten. Die Vocalen e und u befolgen jene festgesezte Regel; die andern drey aber gehen davon ab. Es folgen daher nur die hier eintretenden Regeln.

A.

Geht A vor mehr als einem Consonant vorher, so befolgt es die festgesezte Regel, daß es nemlich annimmt, als stünde nur ein Consonant da; wie cast (käst), ant (ännt), gasp (gäsp).

Steht es vor einem r, so bleibt es auch bey der vorigen Regel, der Accent liegt nemlich auf dem Vocal; wie in bärn (bährn) härm (hährm), märt (mährt).

Geht vor dem a ein w und folgt sodann nach dem a ein r, so hat es seinen dritten langen Laut, wie in wä'rd (wahrd) wä'rm (wahrm) thwä'rt) thwahrt.

Geht zwar dem a ein w vor, es folgt aber nach dem a kein r, sondern ein anderer Buchstabe, so hat a den Laut des ŏ (a); wie in wash (wasch), watch (watsch. — Ausnahmen sind wäst, (wäst), wäsp (wäsp).

Ausnahmen.

1) Wenn a vor zwey ll hergeht, so hat es jederzeit seinen dritten langen Laut, wie in käll (kahl), fäll (fahl), wäll (wahl). Ausgenommen sind shäll (schäll) und mäll (mäll).

2) Wenn ā vor dem l hergehet, und darauf ein anderer Conſonant folgt, ſo hat es auch verſchiedene Eigenſchaften.

Vor ld und lt hat es ſeinen dritten langen Laut, wie in hāld (bahld), hālt (hahlt).

Vor lk hat es auch ſeinen dritten langen Laut, und das l iſt dabey ſtumm; wie in tālk (tahk), wālk (wahk).

Vor th hat es ſeinen erſten langen Laut, wie in bāth (bāhth), lāth (lāhth), pāth (pāhth): ſeinen erſten kurzen Laut in hăth (hăth); und ſeinen dritten langen Laut in brāth (brahth).

E.

E hat vor zwey oder mehr Endconſonanten beſtändig ſeinen erſten Laut; als in bĕnd' (bennd) hĕlp' (hellp), lĕngth' (lennth).

I.

Wenn I vor zwey oder mehrern Endconſonanten ſteht, ſo hat es bißweilen ſeinen erſten, bißweilen aber auch ſeinen zweyten Laut. Seinen erſten Laut hat er vor allen Endungen ausgenommen vor ld, nd, ght; wie in ſĭng (ſinng), ĭnk (innk), dĭſh (diſch), mĭſt (mißt), wĭtch (witſch), hĭnt (hinnt); jedoch muß auch hier pĭnt (peint) ausgenommen werden.

Seinen zweyten Laut hat es 1) vor ld, wie in mīld (meihld); 2) vor nd, als mīnd (meind); 3) vor ght, als mīght meiht); in dem letzten Fall iſt das gh allemal ſtumm.

Geht dieſer Vocal einem r vor, ſo hat es niemals ſeinen eigenthümlichen Laut, ſondern verändert ſich allezeit theils in den erſten Laut des e, theils in den erſten Laut des u. Den erſten Laut des e nimmt es in folgenden an, birth (berth), firth (ferth), girt (gert), girth (gerth), gird, girt, mirth, ſkirt, ſquirt, quirk, chirp, firm, irk, dirge, whirl, twirl. Den erſten Laut des u hat es in dirt, (dorrt), ſlirt, ſhirt, ſpirt, firſt, ſhird, bird.

O.

Der Vocal O hat drey Laute und ſolche ſehr unregelmäßig, indem dieſe verſchiednen Laute offt vor der nemlichen Endung ſich befinden. Es hat die Laute 1) des ŭ (o) 2) des ă (ah), 3) des ŏ (a). Und zwar vor

ck und ff, ŏ (a) mock (mack), ſcoff (ſkaff).
ft, ă (ah) oft, ſoft, lautet ahft ſahft.
ld, ō (oh) bōld, ſōld. Ausgenommen iſt gŏld (guhld).
lk, ō (oh) fōlk, hier iſt das l ſtumm, (fohk).
ll, ō (oh) droll, poll, roll, ſcroll, toll, troll, boll, ſoll, ſtroll. — ŏ (a) toll, doll, noll.
mb, ŏ (a) bomb — ō (oh) comb — ŏ (uh) tomb, womb; das b wird ſtumm und alſo ausgeſprochen wuhm.

ng, ŏ (a) ſong, ſtrong, &c. Ausgenommen iſt tong, welches toung ausgeſprochen wird.

nk, ŭ (o) monk, ſponk — munk (monk), ſpunk, ſponnk).

nt, ŏ (a) ſont, front — ŭ (u) wont (wunt).

rd, ŏ (oh) ford, ſword — ă (ah) chord, cord, lord, — ŭ (o) word.

rk, ă (ah) cork, fork, ſtork — ŏ (oh) pork — ŭ (o) work.

rn, ă (ah) born, horn, corn, morn, &c. ŏ (oh) borne, torn, worn, ſworn.

rt, ŏ (oh) port, fort, ſport — ă (ah) ſhort, ſnort, ſort, — ŭ (o) wort.

ſs, ŏ (a) moſs, gloſs, &c. Ausgenommen iſt grŏſs (groſsz).

ſt, ŏ (a) coſt, loſt, toſt, croſt, froſt — ŏ (oh) hoſt, ghoſt, moſt, poſt — ŭ (o) doſt.

tſh, ŏ (a) got-ſh, mot-ſh — ŏ (oh) bot-ſh, fort-ſh, quot-ſh, ſlot-ſh — ă (ah) brot-ſh, cloat-ſh, frot-ſh, trot-ſh, wrot-ſh — ŭ (o) dot-ſh, mont-ſh, wort-ſh.

lt, ŏ (oh) bolt, colt, dolt, &c.

U.

Der Vocal u hat beſtändig ſeinen erſten Laut, wie in den Wörtern lŭll (loll), plŭck (plock), hŭrl (horrl) ꝛc. Ausgenommen ſind folgende Wörter, wo es den Laut von ŭ (u) hat; bull, full, pull, buſh, puſh.

Von den einſylbigen Wörtern, welche ſich auf ein ſtummes e endigen.

Das ſtumme e in einſylbigen Worten, und wo nur ein Conſonant zwiſchen dem Vocal und dem ſtummen e ſteht, zeigt an, daß die Vocale a und i ihren zweyten Laut haben ſollen; dieſe Regel hat auch im allgemeinen beym Vocal o ſtatt, allein bey dieſem finden Ausnahmen ſtatt. Der Vocal e iſt ſelten in einſylbigen Wörtern der Art von einem ſtummen e begleitet; und wenn dies auch eintritt, ſo hat es bißweilen ſeinen zweyten, bißweilen ſeinen dritten Laut. Der Vocal u hat, wenn er ein ſtummes e nach ſich hat, jederzeit ſeinen dritten Laut; ausgenommen iſt, wenn ein r vor dem ſtummen e hergeht, wo es den Laut des ŭ (uh) hat.

Beyſpiele.

ă (eh) bă'be, ſă'ce. Ausnahmen: ă'r'e (ărr), bă'd'e (bădd), praet. von to bid, gă'pe (găhp), hă'v'e, (hăvv).

ī (ei) trībe, dīce.
ō (oh) hōle, hōme. Ausnahmen: ŏ (o) come, ſome, done, none; wo das o wie ŭ (o) ausgeſprochen wird — ŏ (a) one klingt als wenn es geſchrieben wäre wŏn (wan), gŏn'e, ſhŏn'e. — ŏ (u) lŏſe, whŏſe, mŏve, prŏve. ŭ (o) dove, glove, love, ſhove; wo das o klingt wie ŭ (o).
ē (ih) hēre, mēre. Ausnahmen: ĕ (eh) thĕre, whĕre. — ĕ whĕr'e.
ū (iuh) pūre, mūle. Ausnahmen: ŏ (u) rude, rule, prude, und ſo in allen Wörtern, wo dem ſtummen e ein r vorgeht, klingt das o wie ein ŭ (o).

Wenn aber das End- oder ſtumme e zwey Conſonanten vor ſich hat, wo der Accent nicht auf dem Vocal, ſondern gewöhnlich auf den Conſonanten ſich befindet, ſo muß der Vocal, welcher in einer ſolchen Sylbe ausgeſprochen wird, nach der vorher feſtgeſetzten Regel, nicht ſeinen zweyten, ſondern ſeinen erſten Laut haben.

Beyſpiele: Badge (a vor r bleibt immer lang, wie barge, farce; wovon kaum noch ausgenommen bleibet, wo a den Laut des ŏ (e) hat) chame, pence, ſince, cringe, dodge, horſe (ausgenommen iſt force und worſe, ŭ (o),) ourſe, drudge &c.

Von dieſer Regel müßen die Wörter ausgenommen werden, 1) die ſich auf ange endigen, als rānge, chānge, ſtrānge; 2) die auf the ſich endigen, als bēthe, blīthe, clōthe &c. wo die Vocale ihren zweyten Laut haben; bey dieſem letzten Fall muß jedoch das th als ein einiger Buchſtabe angeſehen werden, da es nur ein einfacher Laut iſt, welcher durch zwey Buchſtaben angezeigt wird.

Von den einſylbigen Wörtern, die ſich auf Vocale endigen, welche ausgeſprochen werden müßen.

Kein engliſches einſylbiges Wort endigt ſich auf a, das ausgeſprochen würde, ausgenommen das Wort a. In den Wörtern pea, tea, ſea, plea &c. zeigt es blos an, daß der Vocal e, welcher dem a vorhergeht, ſeinen dritten Laut haben ſoll.

Der Vocal e, wenn er allein ſteht, wird niemals am Ende eines einſylbigen Worts ausgeſprochen, ausgenommen in den Wörtern hē, thē, wē, mē, yē, und bē, wo es ſeinen dritten Laut hat. Das Wort thē, wenn es einen Nachdruck geben ſoll, hat ſeinen dritten Laut; in allen andern Fällen hat es ſeinen zweyten Laut thĕ kurz

Der Vocal i ſteht niemals am Ende eines engliſchen Worts, und findet ſich blos in einigen Kunſtausdrücken und fremden Wörtern; ſeine Stelle wird durch das y erſetzt, wie in den Wörtern trȳ, frȳ, thȳ, und hat allezeit in einſylbigen Wörtern den Laut des ī (ei).

Der Vocal o endigt auf kein einſylbiges Wort außer folgende: bō̊, gō̊, lō̊, nō̊, ſō̊, wō̊, ſhō̊; whō̊, twō̊, dō̊; tō̊ und dō̊; tō̊ und frō̊, prō̊. Das Wort to hat den Laut des ů, als wenn es tů (tu) geſchrieben wäre.

u endigt niemals allein ein einſylbiges Wort, ausgenommen das Wort lu oder loo, das bißweilen auf die erſtere Weiſe buchſtabirt und lů (luh) ausgeſprochen wird.

Viele einſylbige Wörter giebt es aber, die ſich auf zwey Hülfslaute endigen, obgleich nur der Laut von einem derſelben ausgeſprochen wird. Dieſe nennt Sheridan Doppeltgeſchriebene, Doppelbuchſtaben, oder Digraphen, um ſie von den Doppellauten zu unterſcheiden.

Ay hat jederzeit den Laut des ā (eh); als dāy, prāy, ausgenommen iſt das Bejaungswort āy.
Aw hat allemal den Laut des ā̊ (ah); als dāw, ſāw.
Ea lautet wie ē (ih); als tēa, ſēa.
Ee ebenſo: als ſēe, thēe.
Ey lautet wie ē (eh); als thēy, grēy; ausgenommen wie ē (ih) in kēy und lēy.
Ie wie ī (ei), als līe, dīe.
Oe wie ō̊ (oh), als dō̊e, fō̊e; ausgenommen iſt shō̊e.
Oo wie o̊o (uh) als wo̊o, to̊o, co̊o.
Ou wie o̊u (uh) als yo̊u, — thou iſt ein Doppellaut.
Ow wie ō̊ (oh), als blō̊w, glō̊w, bō̊w (der Bogen), und bey allen den andern einſylbigen Wörtern, nur jedoch mit Ausnahme von bow (das Bücken, Reverenz), cow, how, plow, now, brow, vow, wo ow ein Doppellaut (au) iſt.
Ue wie ů (luh) als clue, blue &c. Ausgenommen iſt rue, true, wo es, wie ſchon vorher bemerkt worden, den Laut des ō̊ nach dem r hat. Ue nach g dient bloß dazu, um anzuzeigen, daß das g ſeinen harten Laut ſtatt ſeines weichen haben ſoll, als rōgue, rōgue; und nach q hat es den Laut des k, als pique.

Die Anzahl der Doppelvocalen oder Digraphen, die ſich am Anfange der einſylbigen Wörter befinden, iſt nicht weniger beträchtlich, wie ſolches aus nachſtehendem Verzeichniße ſich ergiebt:

Ai wie ā (eh) āid, āir &c. Dies hat allezeit den Laut des zweyten a.
Au wie ā (á) in dem Worte āunt, ā (ah) in dem Worte āught.
Aw wie ā (ah) āwe, āwl.
Ea wie ē (ih) ēar, ēat &c. Allezeit behält dies den Laut des ē, ausgenommen wenn es vor einem r vorgeht, auf welches

in der nemlichen Sylbe noch ein anderer Conſonant folgt; als ẽarn' ẽard', ẽartſ.

Ee wie ẽ (ih) ẽel, ẽ'en (ſtatt even), ẽ'er (ſtatt ever).

Ei wie ẽ (eh) ẽight.

Eye wie ẽy (ei) eye.

Oa wie ỏ (oh) ỏaf, ỏak &c. allezeit wie ỏ (oh).

Oo wie ỏ (uh) ỏoze.

Ow wie ỏ (oh) ỏwe, ỏwn. Allein in owl (aul) iſt es ein Doppellaut.

Oi, ou, ſind allemal am Anfange der einſylbigen Wörter Doppellaute, als oil (ail), out (aut).

Die Anzahl der Doppelbuchſtaben in der Mitte der einſylbigen Wörter iſt viel größer, und ihre Töne ſind folgende:

Ai ã (eh) mãid (mehd), pãin (pehn), tãil (fehl) u. ſ. w. Ai wird immer ã (eh) ausgeſprochen; die einzige Ausnahme iſt ſaid, welches wie ſẽd (ſedd) lautet.

Au (ah) cãught (kaht), ſãud (frahd), wãunt (wahnt). Ausnamen ſind hãunt (hánnt), drãught (dráfft), lãugh (láff), jãunt (dſchánnt), ſtãunt (ſtánnt); ſtãunch (ſtánnſch).

Aw ã (ah) bãwl (bahl), dãwn (dahn), lãwn (lahn), der Laut ã (eh) bleibt hier ohne Ausnahme.

Ay ã (ah) cãys (dehs), prãys (prehs); dieſer Laut bleibt durchgängig nur nicht in lays, welches lẽz (ſeß) lautet.

Ea ẽ (ih) ẽal (lihf), ſpẽak (ſpihk), mẽan (mihn); und überhaupt wenn die Sylbe ſich auf einen einfachen Conſonanten endigt; Ausnahmen jedoch ſind in

d, dẽad (dedd), hẽad (hedd), lẽad (ledd), Bley), rẽad (redd), ſtẽad (ſtedd), trẽad (tredd), ſprẽad (ſpredd), dieſe haben immer den Laut des ẽ (e). Die andern Wörter die ſich auf *d* endigen, als rẽad, plẽad, u. ſ. w. folgen der allgemeinen Regel. Die folgenden auf

r, bẽar (behr), pẽar (pehr), tẽar (tehr), wẽar (wehr), ſwẽar (ſwehr), haben den Laut des ẽ (eh). Die übrigen, die ſich auf r endigen, als dẽar (dihr), nẽar (nihr), ſpẽar (ſpihr), u. ſ. w. gehen nach der allgemeinen Regel. Auf

t, ſwẽat (ſweit), thrẽat (thrett), und grẽat (greht) ſind Ausnamen, die zwey erſten haben den Laut von ẽ (e) und das lezte von ẽ (eh). Alle übrigen auf *t* ſich endigenden Wörter haben den dritten Laut. In

k ſtẽak (ſtehk), brẽak (brehk), alle übrigen Wörter haben den Laut von ẽ (ih).

Wenn aber *ea* zwey Conſonanten nach ſich hat, ſo hat es gewöhnlich den Laut des ẽ (e) nach der feſtgeſetzten Regel, daß der Accent in dieſem Falle meiſtentheils auf den Conſonanten ruht;

als rẽalm (rellm) dẽalt (dellt), ſẽarch (ſerrſch) u. ſ. w. heãrt (hårrt), und hearth (hårth) haben den Laut des ã (á). Jedoch ſind von dieſer Regel folgende ausgenommen:

1) Wörter, welche ſich auf *ch* endigen, als tẽach (tihtſch), prẽach (prihtſch); dieſe richten ſich alle nach der allgemeinen Regel.

2) auf *ſt*, als beaſt, feaſt, u. ſ. w. Eine Ausname iſt brẽaſt (breßt).

3) auf *th*, hẽat-ti (hihth), ſhẽat-ti (ſchihth); wrẽat-ti (wrihth); und mit einem *e* am Ende, als brẽathe (brihth).

Ee allemal wie ẽ (ih); als blẽed (blihd), ſtẽel (ſtihl), flẽet (flíht), u. ſ. w. Eine Ausnahme iſt bẽen, welches wie blu (bin) lautet.

Ei allemal wie ẽ; als fẽign (fehn), hẽir (hehr) u. ſ. w. Ausnamen ſind heĩght (heiht), und fleĩght (fleiht), dieſe lauten alſo wie hite und flite, das gh wird ganz verſchwiegen.

Ew wie ů (uh), lewd, ſtew'd u. ſ. w. Allemal wie ů (uh); jedoch ſind ausgenommen ſhew'd und ſhewn, welche ausgeſprochen werden wie ſhõd (ſchod) und ſhõn (ſchon).

Je wie ẽ (ih), griẽf (grihf), fiẽld (fihld) fiẽnd (fihnd) u. ſ. w. Ausnahmen ſind: friẽnd (frennd), fiẽrce (ferrs), piẽrce (perrs), tiẽrce (terrs), und fiev'e (fiv). Das praeteritum der verborum, die ſich auf ie endigen, als die, lie, diẽd (deihd), liẽd (leihd).

Oa wie ỏ (o), bỏat (boht), loạd (lohd), grỏan (grohn), u. ſ. w. Ausnahmen ſind; broạd (brahd), groạt (graht).

Oo wie ů (uh) pỏor (puhr), fỏod (fuhdd), cỏol (kuhl), u. ſ. w. Ausnahmen ſind hood, good, ſtood, wood, look, took, foot, ſoot, wool; Alle werden wie ů (u) ausgeſprochen; — dỏor (dohr), flỏor (flohr), wie ỏ (oh); und blood, flood, wie ŭ (o).

Ou iſt gewöhnlich ein Doppellaut, als loaud, (laut), gout (gaut), u. ſ. w. Ausnahmen ſind: cough (cỏf, kaff), rough rŭf, roff), tough (tŭf toff,) ſcoŭrge (ſkordſch), toŭch (totſch), yoŭng (jong) alſo wie ŭ (o); — ſỏur (fohr), mỏurn (mohrn), mỏuld (mohld), cỏurt (kohrt), thỏugh (thoh), dỏugh (doh), ſỏurce (ſohrs), mỏuld (mohld), welche alle wie ỏ (oh) ausgeſprochen werden; — wie ů (uh) thrŏugh (truh), yŏur (juhr), yŏuth (juhth), wŏund (wuhnd); — wie ŭ (u) wobey das l verſchwiegen wird in coŭld (kudd) ſhoŭld (ſchudd), woŭld (wudd); — wie ạ (ah) wobey gh ſtumm iſt, als bought (bạt, baht), brought (brạt braht), fought, mought, ſought, thought.

Ow hat den Laut des ỏ (oh) in bowl (bohl), rowl (rohl), und in Präteritis und Participiis der einſylbigen Wörter, die ſich auf *aw* endigen, als flow'd (flohd), flown (flohn), grown (grohn), u ſ. w. Ausnamen ſind; to cow (kau), vow (wau),

plow (plau), wo es ein Doppellaut wird; Eben dieſer Laut bleibt in allen andern Fällen, als brown (braun), fowl (faul), u. ſ. w.

Ua iſt in guärd ein Doppelbuchſtabe, denn das *u* bleibt ſtumm; nach *q* iſt es aber allemal ein Doppellaut, als ſquall (ſkwahl), quart (qwahrt) u. ſ. w.

Ue iſt ein Doppelbuchſtabe nach *g*, als in guëſs (ghęß), guëſt (ghęßt); aber ein Doppellaut nach *q*, als in queſt (kweßt).

Ui iſt ein Doppelbuchſtabe in build (billd), built (billt), guilt (gillt). Quilt (kwillt) iſt ein Doppellaut. Guide, guile haben einen Doppellaut, und werden ausgeſprochen als wenn es geſchrieben wäre gȳde (ghęid), gȳle (ghęil). In Juice (dſchuhs), bruiſe (bruhs), cruiſe (kruhs), fruit (fruht), iſt es ein Doppelbuchſtabe und lautet wie ů (uh). In Suil iſt es ein Doppellaut und als wenn es geſchrieben wäre ſȳů (ſiuhl).

W bildet in der Mitte einer Sylbe mit dem darauf folgenden Vocal allezeit einen Doppellaut, wie in ſwain (ſwehn), twice (tweis). Es findet ſich übrigens dieſer Buchſtabe nur nach den Conſonanten ſ, t, und th.

Y findet ſich niemals in der Mitte der Sylbe mit einem Vocal, welcher darauf in der nemlichen Sylbe folgt; denn die Stelle des y bey der Bildung der Selbſtlaute wird allemal durch den Vocal *i* erſetzt.

Von einſylbigen Wörtern, die durch Doppellaute gebildet werden.

Es iſt ſchon oben angeführt worden, daß zwey Vocale in der That Doppellaute ſind, nemlich ȋ (ei) in lȋght (feiht), und ů (iuh) in blůe (bliuh). Da nun aber dieſe Laute durch einen einzelnen Buchſtaben angezeigt werden, und von denſelben ſchon unter den Vocalen gehandelt worden iſt, ſo iſt hier nicht nöthig, noch etwas darüber zu ſagen. Die andern Vocalen ſind *oi*, *ou* und die, welche durch *w* und *y* gebildet werden.

Der Doppellaut *oi* wird auch durch *oy*, und *ou* durch ow bezeichnet; *y* und *w* erſetzen die Stelle des *i* und *u* am Ende der Wörter; Und es läßt ſich von dieſer Sonderbarkeit, daß dieſe Buchſtaben ſich niemals am Ende der urſprünglich engliſchen Wörter finden, gar keine andere Urſache, als Willkührlichkeit, angeben. Gleichwohl finden ſich auch hier drey Ausnamen von dieſer Regel, nemlich die Pronomen, ȋ (ei) thou (thau), und you (iuh).

Oi und *oy* ſind beſtändig Doppellaute, und behalten auch beſtändig den nemlichen Laut, als broil (brail), moiſt (maißt), boy (bai), joys (dſchais).

Ou und *Ow*, haben auch den nemlichen Laut und ſind allezeit Doppellaute, wie in mouth (mauth), owl (aul), ausgenommen in den Wörtern, von welchen in der Lehre von den Doppelbuchſtaben gehandelt worden iſt. Keiner von dieſen Lauten wird durch irgend eine andre Verbindung von Buchſtaben vorgeſtellt.

Von Doppellautern, die durch *w* gebildet worden.

Wa. Wenn *w* vem à vorgeht, ſo hat der Vocal ſeinen erſten Laut allein in den folgenden Worten: wȧſt (wäfft), wȧg (wägf), wȧn (wänn), wȧſp (wäſp), wȧk (wäks).

In allen andern einſylbigen Wörtern, die ſich auf einen Conſonant endigen, hat es entweder den kurzen Laut des ă (a) oder des ŏ (a), als wod (wadd), was (was), wat (watt), waſh (waſch), watch (watſch); oder es hat den vollen langen Laut nach den oben feſtgeſetzten Regeln des Vocals *a*; wenn es vor einem *r* oder *l* ſteht, als wȧr (wahr), wȧrn (wahrn), wȧlk (wahk), wȧll (wahl).

Wenn das einſylbige Wort ſich auf ein ſtummes *e* endigt, ſo folgt der mit *w* verbundene Vocal *a* der Regel, die für ihn in ſeiner einfachen Stellung feſt geſetzt worden, und behält jederzeit ſeinen zweyten Laut; als wage (wehdſch), wade (wehd), ware (wehr).

Wenn *w* vor einem Doppelbuchſtaben ſteht, welcher mit einem *a* anfängt, ſo wird die nemliche Regel befolgt, die vorhin bey ſolchen Doppelbuchſtaben feſtgeſetzt worden iſt; als way (weh), wail (wehl), u. ſ. w.

We. Der Doppellaut *we* befolgt die Geſetze des einfachen Vocals *e*; vor einem einfachen oder Doppelconſonant hat es allemal ſeinen erſten Laut, als wĕd (wedd), wĕſt (weßt). Das einzige Wort, worinn dieſer Doppellaut einen Conſonant mit einem ſtummen *e* am Ende verbunden iſt, iſt *were*, welches kurz mit dem Laut des erſten *e* ausgeſprochen wird, wĕr (werr).

Dies *w* vereinigt ſich auch mit dem Doppelbuchſtaben *ea*, deßen Regel der Ausſprache es auch befolgt; der gewöhnliche Laut iſt der des ē (ih); Als wēak (wihk), wēan (wihn); vor *r* wie ē (eh), als wēar (wehr), ſwēar (ſwehr); Vor zwey Conſonanten wie ĕ, als wēalthi (welthy); Wenn es vor einem *e* ſteht, lautet es wie ē (ih), als wēek (wihk), wēed (wihd). Mit einer Aſpiration wird es vor *ey*. in dem Worte *whēy* (whey) ausgeſprochen.

Wi. Dieſer Doppellaut richtet ſich nach den Regeln des einfachen Vocals *i*. Vor einem oder mehrern Conſonanten lau-

tet es wie i (i), als wit (witt), wing (winng), wish (wisch), u. ſ. w. Davon werden die Endungen auf *ght*, *ld* und *nd* ausgenommen; als wight (weiht), wild (weild), wind (weind). Die Ausſprache des Wortes *wind* iſt ſtreitig; gewöhnlicher wird es wind (winnd) ausgeſprochen.

Wenn ein *e* das Wort endigt, ſo iſt allemal der zweyte Laut, als wife (weihf), wine (weihn), wire (weihr).

Dieſer Doppellaut vereinigt ſich auch nur allein mit dem Vocal *e*, ausgenommen in dem Worte wield (wihld).

Wo. Das *o* hat in dieſem Doppellaute ſeinen erſten Ton in dem veralteten Worte wot (watt). Es wird in u (o) verwandelt in dem Worte won (wun wonn), und in allen denjenigen Wörtern wo *o* ein *r* nach ſich hat; als word (word) work (work), world (world), worſe (wors). Ausgenommen ſind die Participia worn (wohrn), und ſworn (ſwohrn), das Wort wo (woh) mit ſeinen abgeleiteten Wörtern, und alle Wörter, die ſich auf ein ſtummes *e* endigen, als woke (wohk), wore (wohr). u. ſ. w.

Wie o (uh) in dem Worte womb (wuhmb). Dieſer Doppellaut verbindet ſich mit *a* allein in dem Worte woad (wohd)—; mit o (uh) in woo (wuh), woof (wuhf) —; mit u (u) in wood (wudd), wool (wuhl), would (wudd); wound (wunnd, ein Schaden) und wound (waund, das praeter. vom verbo to wind).

Einige Doppellauter, die durch das *w* gebildet werden, haben ein t oder thh vor ſich, und folgen den Regeln der einfachen Selbſtlauter; als twain (twehn), twang (twaung), twelve (twellv), twig (twigk), twin (twinn), twine (tweihn) twirl (twerl, twerl), thwart (thwahrt). *Two* iſt kein Doppellaut, ſondern wird to (tuh) ausgeſprochen.

Von den Doppellauten, die durch Y gebildet werden.

Ya. Dieſer Doppellaut erhält den Ton des o (a) in yacht (yot, jatt), und geht nach der Regel des *a* vor dem *r* in yard (jahrd), yarn (jahrn); vor dem e am Ende in yare (jehr); vor aw in yawn (jehn), yawl (jahl).

Ye. hat den Laut des e (ih) in dem Pronomen ye (jih); des e (eh) in der Bejahung yea (jeh); des e (ih) in yean (jihn), year (jihr); des e (e) in yearn (jernn), yell (jell), yelk (jellk), yelt (jeſt), yet (jet); des i (i) in yes (yis jis); des o in yelk, welches ausgeſprochen wird, als wenn es geſchrieben wäre yoke (johk), das Dotter, Gelbe im Ey).

Yi. yield (jihld).

Yo. yon (jann). Vor *u* wie o (uh), als you (juh), your (juhr),

yǒuth (juhth): Ausgenommen ist young welches yŭng (jonng) ausgesprochen wird; wie ǒ (oh) mit dem e am Ende, als yǒke (johk), yǒre (johr). Y bildet nur einen Dopellaut, wenn es ein Wort anfängt, wo sogleich ein andrer Vocal darauf folgt. In der Mitte der Sylben und Wörter wird die Stelle des y, allemal durch ein i ersetzt.

Siebenter Abschnitt.

Von zweysylbigen Wörtern.

Da die Aussprache der engländischen Wörter vorzüglich durch den Accent ihre Bestimmung und Richtung erhält, so ist vor allen Dingen nöthig, festzusetzen, was unter dem Accent verstanden werden soll.

Der Accent ist eine gewisse Stärke oder ein gewisser Nachdruck der Stimme auf einen Buchstaben oder eine Sylbe, welche dadurch sich von allen andern Buchstaben des Wortes unterscheidet.

In den einsylbigen Wörtern kan man diesen den accentuirten Buchstaben nennen; und in mehrsylbigen Worten heißt die accentuirte Sylbe diejenige, welche den auf solche Weise vor allen andern Buchstaben des Worts sich unterscheidenden Buchstaben enthält.

Die Würkung des Accents in einsylbigen Wörtern, nachdem er auf einen Vocal oder Consonant gelegt ist, ist schon bemerkt worden. Liegt der Accent auf dem Consonant, so haben die Vocalen gewöhnlich ihren ersten Laut, ausgenommen in den wenigen Fällen; wo der Laut eines andern Vocals an die Stelle deßen, der sich wirklich unserm Auge darstellt, gesetzt wird.

Liegt der Accent auf einem Vocal, so hat dieser bißweilen seinen zweyten, bißweilen seinen dritten Laut, nach den bereits festgesetzten Regeln. Den ersten Laut hat er aber niemals, ausgenommen der Vocal a in einigen wenigen Fällen

Was von den einsylbigen Wörtern in Ansehung des Accentes gilt, das gilt auch von den zwey und mehrsylbigen Wörtern. Um nun die Aussprache auf feste Grundsätze zu bringen, so muß man vor allen Dingen zu entdecken lernen, auf welcher Sylbe in einem mehrsylbigen Worte der Accent ruht. Bey zweysylbigen Wörtern gilt folgendes.

Beynahe alle zweysylbigen Wörter haben den Accent auf der ersten Sylbe, und diejenigen, welche ihn auf der letzten Sylbe haben, sind größtentheils zusammengesetze Wörter, und diese Zusammensetzung wird vorzüglich durch Präpositionen, die aus dem lateinischen herkommen, bewürkt; solche Wörter sind: ab, ac,

ad, at, com, con, de, dis, em, en, e, ex, im, in, ob, op, per, pre, pro, re, se, sub, sur, trans, u. s. w. Beyspiele: ăbhor', ădmit', ăffirm', cŏmmen'ce, cŏnduct', dĕce'ive, dilă'rm, embărk, (imbăhrk), enchant' (intschănnt), ĕxalt, impăir, incĭte, ŏbscu're, ŏppo'se, pĕrmit', prŏpo'se, rĕcant', sĕclu'de, sŭbmit', sŭrve'y, trănsfo'rm, una'rm.

Außer diesem giebt es noch folgende, ursprünglich englische Sylben; a, be, for, fore, mis, out, un — Beyspiele: ăba'se, bĕfo're, fŏrget', fŏrewa'rn, misgiv'e, outdo', una'rm, u. s. w. Alle Wörter, die aus den letztern Vorsylben zusammengesetzt worden, haben größtentheils den Accent auf der letzten Sylbe; allein in Ansehung der erstern oder der lateinischen Vorsylben giebt es folgende Ausnamen:

1) Wo das Verbum und das Nomen durch einerley Wort ausgedrückt werden, da haben die Nomina häufig den Accent auf der ersten, und die Verba auf der letzten Sylbe, welches aus nachstehender Liste ersichtlich wird.

Ausgenommen dieſe eben angegebene Liſte haben alle übrigen Wörter, wo das Verbum und das Nomen einerley iſt, auch einerley Accent; z. B. aſſault, affront, aſſent, attire, array, diſplay, repoſe u. ſ. w.

2) Die Regel, daß der Accent auf die letzte Sylbe bey den zuſammengeſetzten, zweyſylbigen Wörtern geſetzt wird, hat vorzüglich ſtatt bey den Verbis und bey ſolchen Nominibus, deren eben gedacht worden iſt; Andre Nomina und andre Redetheile folgen der allgemeinen Regel, nach welcher der Accent gewöhnlich auf der erſten Sylbe liegt. Z. B. concord, conquer, diſmal; diſtant, extant u. ſ. w. Und ſelbſt bey den Wörtern, die mit der urſprünglich engliſchen Sylbe *our* zuſammengeſetzt ſind, ruht der Accent nur allein bey den Verbis auf der letzten Sylbe, bey allen andern Wörtern aber auf der erſten Sylbe; als: to outdo', outbid', u. ſ. w. an out'cry, out'rage u. ſ. w. Es giebt alſo einige zuſammengeſetzte Verba, welche den Accent auf der erſten Sylbe haben, als perjure, injure, conjure, und einige wenige andere, die durch den Gebrauch gelernt werden müßen.

Regeln um den Buchſtaben zu erkennen, auf welchem der Accent in zweyſylbigen Wörtern liegt.

Wenn ſich zwey Conſonanten zuſammen in der Mitte zweyſylbiger Wörter finden, ſo wird gewöhnlich der erſte Conſonant zu dem erſten Vocal, und der zweyte zu dem zweyten gezogen; der Accent ruht ſodann auf dem erſten Conſonant: z. B. ab'ſent, am'ber, bab'ler, diſ'cord, chear'ful u. ſ. w. Eben dies hat auch ſtatt, wenn ein Conſonant doppelt ſteht, als od'der, baſ'fle, beg'gar, bet'ter, cher'ry, col'lege, u. ſ. w. hiervon ſind allein die zuſammengeſetzten Verba ausgenommen, deren ſchon gedacht worden.

Wenn nur ein Conſonant ſich in der Mitte befindet, ſo liegt gewöhnlich der Accent auf dem vorhergehenden Vocal, Doppellauter, oder Doppelbuchſtaben, als: a'gue, an'dir, bi'ble, boo'ty, ci'der, cru'el, dow'el, u. ſ. w. Bißweilen wird der einfache Conſonant zu der erſten Sylbe gezogen und erhält den Accent; als

blem'-iſh, cher'-riſh, cho'-ler, hab'-it, fam'-iſh, pal'-ace, per'-il, pun'-iſh, rad'-iſh, ſin'-ew, ten'-ant, u. ſ. w. Die Anzahl dieſer Wörter iſt jedoch nicht groß, und muß durch den Gebrauch erlernt werden.

Wenn der Accent auf der letzten Sylbe liegt, ſo lernt man ſeine Stelle dadurch kennen, daß man eben die Regeln befolgt, welche für die einſylbigen Wörter feſtgeſetzt worden ſind.

Von vielſylbigen Wörtern.

Da der Accent der vielſylbigen Wörter vorzüglich durch die Endſylbe beſtimmt wird, ſo ſind diejenigen Endſylben, welche am häufigſten in der engliſchen Sprache vorkommen, zu dieſem Endzweck nun zu betrachten. Um die verſchiednen Sylben der Wörter zu bezeichnen, ſollen die zu dieſem Endzwecke gewöhnlichen lateiniſchen Kunſtausdrücke gebraucht und alſo die letzte Sylbe außer einer die Penultima, und die letzte Sylbe außer zwey Sylben die Antepenultima, beyde aber auf folgende Weiſe penult, antepenult. abgekürzet werden Fällt der Accent noch weiter zurück, ſo wird die Stelle durch die vierte oder fünfte Sylbe von der letzten angedeutet.

Endungen.

In *ic.*

Bey Wörtern, die ſich auf *ic* endigen, liegt der Accent auf den Buchſtaben, der unmittelbar vor der Endung ic hergeht, es mag dieſer Buchſtabe nun ein Vocal oder ein Conſonant ſeyn. Z. B. proſa'ic, ſyllab'ic.

Ausnahmen: Wenn zwey Conſonanten der Endung ic vorgehen, ſo gehört der erſte Conſonant zur erſtern Sylbe und hat den Accent; der letztere Conſonant gehört zur letztern Sylbe; als, lethar'gic, repub'lic; Ausgenommen iſt rúbric, wo die zwey Conſonanten zu der letzten Sylbe gezogen werden.

In den folgenden Wörtern endigt der Vocal die erſte Sylbe; cubic, aulic, muſic.

Die folgenden werfen den Accent zurück auf die antepenult. oder letzte Sylbe außer zweyen; chol'eric, tur'meric, rhet'oric, lun'atic, ſplen'etic, her'etic, pol'itic, arith'metic.

In *ed.*

Alle engliſchen Verba endigen ihre Präterita und Participia im Paſſivo auf *ed;* aber dieſe Sylbe wird ſelten beſonders ausgeſprochen, der Vocal *e* wird nicht gehört, und das *d* zu der vorhergehenden Sylbe gezogen; z. B. unman'nerd, illna'tur'd, impaſ'ſion'd u. ſ. w.

Ausnahmen: Wenn *ed* ein *d* oder ein *t* vor ſich hat, ſo wird das *e* gehört, und macht mit jenen Buchſtaben eine Sylbe aus, als divided, intended, created, animated. Wie der Accent im Stammwort iſt, ſo bleibt er auch in den abgeleiteten Wörtern; als: eſtab'liſh'd, deter'min'd, unboun'ded, cul'tivated.

In *ance.*

Vielſylbige Wörter haben den Accent gewöhnlich auf der antepenult. Z. B. ar'rogance, el'egance, ſignif'icance.

Ausnahmen: 1) Wenn das Stammwort den Accent auf der letzten Sylbe hat, ſo hat das abgeleitete Wort den Accent auf der penult.; als appéarance, aſſúrance; von appéar, aſſúre: 2) wenn zwey Conſonanten vor ance vorhergehen, als abun'dance, diſcor'dance. Wenn der Endung *ance* der Vocal *i* vorgeht, ſo wird der Vocal zu der letzten Sylbe gezogen, und bildet mit derſelben einen Doppellaut; rádiance, valliance, welche ausgeſprochen werden, als wenn ſie geſchrieben wären rá-dyance, v.l'-yance. Ausgenommen ſind die nomina, welche von Verbis gebildet werden, die ſich auf ein accentuirtes *y* endigen; als, deſiance, alliance; von den Verbis, defy', ally'; hier machen defiance (dehfeiáns) und alli'ance (álleiáns) drey Sylben aus.

In *ence.*

Der Accent in vielſylbigen Wörtern, die ſich auf *ence* endigen, liegt gewöhnlich auf der antepenult. Z. B. in'nocence magnif'icence, benev'olence.

Ausnahmen: 1) Abgeleitete Worte behalten den Accent ihres Stammworts; als purſúance, adhérence, von purſúe, adhére.

2) Wenn zwey Conſonanten vor der Endung *ence* hergehen, ſo kömmt der Accent auf die erſte Sylbe; als effulgence, emer'gence, effervel'cence. Wenn Wörter ſich auf *ence* endigen und vor dieſer Endung ein *ſ* ſteht, ſo liegt der Accent allemal auf dem *ſ*; als quieſ'cence, excreſ'cence, intumeſ'cence; Ausgenommen iſt nur concupiſcence.

Wenn *ence* ein *i* vor ſich hat, ſo bildet dies einen Doppellaut: als expérience, obédience. Ausgenommen iſt wenn noch ein *c* oder *t*, vorhergeht, alsdenn wird es wie eine Sylbe ausgeſprochen und lautet wie ſhenſe (ſchens); als, deficience (dehfiſchens), patience (pehſchens).

In *ble*

Die Endung *ble* wird beſtändig vor eine Sylbe gerechnet, obgleich ſie es eigentlich nicht iſt; denn um eine Sylbe zu bilden, ſo iſt es nothwendig, daß ein Vocal darin gehört werde, welches hier der Fall nicht iſt; obgleich auch hier zwar dem Auge ein Vocal am Ende ſich darſtellt, ſo iſt es doch nur ein ſtummes e am Ende, und das *ble* wird in der erſten Sylbe mit ausgeſprochen.

Allgemeine Regel.

Da die Wörter, die ſich auf *ble* endigen, gröſtentheils Adjectiva ſind, welche von Verbis gemacht worden, ſo folgen ſie gewöhnlich ihren Stammwörtern in Anſehung des Accents; als: repro'veable, prop'agable, abol'iſhable, diſciplinable, diſcri'minable,

von repro've, prop'agate u. ſ. w. Ausgenommen ſind reme'diable, irrep'arable, diſ'putable, von rem'edy, repa'ir, diſpu'te. Ueberhaupt wird der Accent beyvielſylbigen Wörtern weit zurück und bis auf die vierte und fünfte Sylbe geworfen; als am'icable, vi'olable, mon'oſyllable — und wenn der Accent nicht weiter zurück als auf der Antepenult. liegt; ſo geſchieht dies entweder, wenn das Wort ſich nach ſeinem Stammworte richtet, als advi'lable, deri'vable; oder wenn zwey Conſonanten in dieſer Stelle zuſammen kommen, als intrac'table, delec'table, refran'gible. Davon ſind jedoch ausgenommen ac'ceptable, und ſeine abgeleiteten Wörter.

Alle dreyſylbigen Wörter haben den Accent auch der antepenult.; ausgenommen ſind diejenigen, wo einem zweyſylbigen Worte eine Präpoſition in der Zuſammenſetzung vorgeſetzt wird, als una'ble, unſta'ble.

In *cle.*

Alle dreyſylbigen Wörter haben den Accent auf der antepenult. Z. B. mir'acle, or'acle, ve'hicle. Die andern vielſylbigen Wörter haben den Accent weiter zurück; als tab'ernacle, rec'eptacle, con'venticle u. ſ. w.

In *dle, fle, gle, kle, ple, tle.*

Was von der Endung *ble* gilt, das gilt auf von den angeführten Endungen, nemlich, daß ſie eigentlich keine Sylbe ausmachen, ſondern daß ſie mit der vorhergehenden Sylbe vereinigt werden, ohne die Darzwiſchenkunft irgend eines Vocals.

Es giebt wenige Worte von mehr als zwey Sylben mit den obigen Endungen, und der Accent liegt auf dem Buchſtaben, der unmittelbar jenen Endungen vorgeht, dieſer Buchſtabe mag nun ein Vocal oder ein Conſonant ſeyn; als cra'dle, ſad'dle, ſnaf'fle, e'agle, ſtrug'gle, tac'kle, buc'kle, ap'ple, pur'ple, u. ſ. w.

Es giebt wenig vielſylbige Wörter auf die Endung *ple*, welche den Accent auf der antepenult. haben; und dieſe ſind, man'ciple, prin'ciple, quad'ruple, ſex'tuple, und alle, die ſich auf *uple* endigen. Ein einziges Wort hat den Accent auf der vierten Sylbe rückwärts, par'ticiple.

In *ure.*

Die vielſylbigen Wörter, welche ſich auf *ure* endigen, haben den Accent auf der antepenult. oder auch noch weiter zurück auf der vierten Sylbe; als, cy'noſure, ju'dicature, leg'iſlature, ar'chitecture; Ausgenommen ſind die Wörter, welche ſich nach ihrem Stammwort richten, als enclo'ſure, intermix'ture.

In *ate.*

Allgemeine Regel.

Die Wörter, die ſich auf *ate* endigen, haben größtentheils den Accent auf der antepenult; z. B. rep'robate, im'precate, liq'ui-

date, multip'licate, u. ſ. w. ausgenommen iſt, wenn zwey Conſonanten der letzten Sylbe vorangehen; als conſum'mate. conſtel'late.

Wenn der Vocal *i* der Sylbe *ate* vorgeht, der vorhergehende Conſonant mag ſeyn welcher es will, nur nicht *c* und *t*, ſo vereinigt er ſich mit der letzten Sylbe in den Laut eines Diphthongs; als to irra'diate, colle'giate, calum'niate, u. ſ. w. welche nicht wie vier beſondere Sylben ausgeſprochen werden, als ir-ra-di-ate, ca-lum-ni ate, ſondern irra'-dyate, calum'-nyate; wenn aber das vor der Endung *ate* ſtehende *i* ein *c* oder *t* vor ſich ſtehen hat, ſo verändern dieſe Buchſtaben ihren Laut in den des *ſh* (ſch), und der einfache Vocal, nicht aber der Doppellaut, wird gehört; als aſſociate, (aſſo'ſhate); negotiate (negoſ'hate).

Die Sylbe *ate* wird am Ende der Wörter ate (eht) mit dem Laut des ä (eh) ausgeſprochen. Bey andern Fällen hat es den Laut des ĕ; als, to aggregate — an aggregĕt; to aſſociate — an aſſocĭĕt; to articulate (ein Verbum), articulĕt ein Adjectivum.

In *ive.*

Dieſe Endung hat allezeit in vielſylbigen Wörtern den kurzen Laut des I (i), Iv.

ſive.

Die Wörter, die ſich auch *ſive* endigen, haben allemal den Accent auf der penult. und auf dem Buchſtaben, der unmittelbar dieſer Endung vorgeht, es mag nun ein Vocal oder ein Conſonant ſeyn; als adhe'ſive, repul'ſive, ſubmiſ'ſive.

tive.

Die Wörter, die ſich auf tive endigen, haben den Accent größtentheils auf der antepenult. oder noch weiter zurück. Z B. neg'ative, rel'ative, vindicative, ſignif'icative, communicative, &c.

Ausnahmen ſind: 1) Wenn ſie ſich nach ihren Stammwörtern richten, als eva'ſive, deci'ſive, von evade, decide. 2) Wo zwey Conſonanten dieſer Endung vorangehen; als calefac'tive, atten'tive, preſump'tive, aſſer'tive, diges'tive; Ausgenommen iſt ſub'ſtantive, welches ſich nach ſeinem Stammwort ſub'ſtance richtet.

Der Accent liegt niemals auf der letzten Sylbe *tive*; ausgenommen nur in dem Worte reci'tative.

In *ing.*

Dies iſt die Endung der activen Participien von allen Verbis, und hat jederzeit den Accent des Stammworts, und iſt niemals für ſich accentuirt.

In *cal.*

Alle Wörter die ſich auf *cal* endigen, haben ohne Ausnahme den Accent auch der antepenult; als la'ical, ſyllab'ical, method'ical &c.

In *ial.*

Dieſe Endung lautet allemal wie eine Sylbe, die ſich mit

dem vorhergehenden Consonant in einen Doppellaut vereinigt; als la bial, cor-dial, conge´ nial, minifte´ rial, mit dem Laut *yal*. Wenn aber ein *c* oder *t* voranfteht, fo hört es auf ein Doppellaut zu feyn, und erhält den Laut von *fhal*, als judicial, artficial, fubftantial, reverential, diefe werden ausgefprochen judifhal, fubftanfhal.

Der Accent bey allen Wörtern, die fich auf diefe Weife endigen, liegt in der penult. unmittelbar auf den der Endung vorhergehenden Buchftaben, wenn diefer ein Vocal oder ein einzelner Conſonant iſt, und wenn zwey Conſonanten vorhergehen, fo liegt der Accent auf dem erften Conſonant; als connú-bial, conviv'-ial, creden'-tial.

Nur allein in den Wörtern deni' al, decri'-al, hat es den Accent auf den *i*, und bildet fo zwey Sylben.

In *ful*.

Dies iſt eine Endung von Adjectivis, die aus Subſtantivis gebildet worden, und alle auf diefe Weife gebildeten Wörter behalten den Accent ihrer Stammwörter, als reveng'eful, won'derful.

In *ian*.

Diefe Endung, wenn fie den Buchftaben *c* vor fich hat, wird ausgefprochen *fhan*; als logic'ian, academic'ian werden ausgefprochen logifhan (logifchán), academifhan (akádemifch'n).

Der Accent ruht auf dem Conſonant. Wenn *t* der Endung vorgeht, fo hat der nemliche Laut ſtatt; als tertian. gentian; Ausgenommen wird jedoch, wenn dem *t* noch ein *ſ* vorgeht; als chriſtian, ſuſtian, wobey das *t* ſeinen eignen Laut behält.

Wenn *d* oder *g* der Endung vorgehen, fo hat es den Laut des *j*, als comedian, collegian.

Mit allen andern Buchftaben bildet es einen Doppellaut; als acade'mian, fatur'nian, libra'rian, hiſto'rian, dilu'vian; und der Accent liegt auf den Buchftaben, der unmittelbar vor der letzten Sylbe vorhergeht, es mag dies nun ein Vocal oder Conſonant ſeyn.

In *en*.

Die Wörter die fich auf *en* endigen, laßen gewöhnlich den Vocal *e* weg, ſo daß der Buchftabe *n* unmittelbar an den vorhergehenden Conſonant geknüpft wird; als lead'n, hid'd'n, chof'n, hall'n, gliſt'n u. ſ.w. Ausgenommen ſind ſudden, ſullen und barren.

Wenn ein *m* dem Vocal *e* vorhergeht, ſo wird der Vocal ausgeſprochen und es entſteht daher eine Sylbe; als hymen, women, regimen, ſpecimen. Das nemliche gilt, 1) wenn ein *r* vorhergeht; ſiren, warren, brethen. und 2) bey allen Subſtantivis mit allen andern Conſonanten; als garden, burden, chiken, linnen: Ausgenommen wird tok'n, und alle Wörter, die ſich auf *ven* und *zen* endigen, als heav'n, rav'n, doz'n, mizz'n.

Wenn die Endung *en* als eine Sylbe ausgeſprochen wird, ſo

wird der Laut in in (in) verwandelt; als burdin, women, (dies wird ausgesprochen wimmin) wo'min u. s. w. Ausgenommen sind aber die Wörter, welche sich auf *men* endigen; als hymén, specimén, acu'mén, u. s. w.

In *ion*.

Alle Wörter, die sich auf *ion* endigen, nehmen den vorhergehenden Consonant zu der letzten Sylbe, und bey der meisten wird da die Endung *ion* als ein Doppellaut ausgesprochen. Z. B. gabion, vermil'ion, mil'lion. — Wenn der vorhergehende Consonant auch nur ein einzelner ist, so wird er in der Aussprache doch verdoppelt, wenn der Accent darauf liegt. So hat das Wort *vermilion*, ob es gleich nur ein *l* hat, eben den Ton, den million mit zwey *ll* hat, und wird ausgesprochen, als wenn es vermillyun geschrieben wäre. Eben dies hat auch statt bey den andern Consonanten; als, opin'ion, clar'ion u. s. w.

Der Sitz des Accents ist entweder auf dem einzelnen Consonant, welcher der Endung *ion* vorhergeht, wie in den vorigen Beyspielen gezeigt worden ist, oder auf dem ersten Consonant, wenn zwey oder mehrere beysammen sich befinden; als, in quater'nion, septen'trion; oder auch auf dem Vocal, welcher unmittelbar vor dem Consonant steht; als, decu'rion, occa'sion, cummu'nion.

Endungen in *sion*.

Die Laute der Vocalen vor dieser Endung sind folgende:

ä'sion ë'sion i'sion ö'sion ü'sion	ausgesprochen.	occä'zhun (akkähsch'n) adhë'zhun (ädhihsch'n) deci'zhun (dezisch'n) explö'zhun (eksplohsch'n) confü'zhun (kanfiühsch'n)

Wenn aber der Accent auf einem Consonant, welcher der Endung *sion* vorhergeht, ruht, so ist der Laut nicht mehr *zhun* sondern *shun*; als emul'sion, expan'sion, submer'sion, compul'sion. Hier wird nur der Fall ausgenommen, wo der Accent auf einem *s* liegt, welches den Vocal *i* vor sich hat, denn hier hat der Laut zhun noch statt; als incision, derision; diese Wörter werden ausgesprochen, als wenn sie inciz'zhun, deriz'zhun geschrieben wären.

In *tion*.

Diese Endung lautet immer wie *shon*, nur nicht wenn der Endung tion ein *s* vorhergeht; die Laute der vorhergehenden Vocale sind folgende:

ä'tion ë'tion i'tion ö'tion ü'tion	ausgesprochen.	appröbä'shun (äpprobähsch'n) replë'shun (rehplihsch'n) posi'shun (posisch'n) devö'shun (dewohsch'n) revolü'shun (rehwoliuhsch'n)

Wenn ein Consonant der Endung tion vorhergeht, so liegt der Accent auf diesem Consonant; als satisfac'tion, imperfec'tion,

injunc'tion, ſubſcrip'tion, u. ſ. w. und die Endſylbe wird *ſhun* ausgeſprochen; der einzige Fall, wo ſie wie *tſhun* lautet iſt, wenn der Sylbe ein *ſ* oder *x* vorhergeht; als digeſtion, commixtion — dieſe Wörter werden ausgeſprochen, diges'tſhun (didſcheſtſch'n), commix'tſhun (kammikſtſch'n), und dies findet ſtatt bey allen Wörtern dieſer Art.

Das *o* in der Endung *ion* hat allemal den Laut des ŭ (o); und wird alſo nicht ausgeſprochen yŏn (jan, ſondern yŭn (jon).

In *eer* und *ier*.

Alle vielſylbigen Wörter in *eer* haben den Accent auf der letzten Sylbe, und eben dies gilt auch von denen, welche ſich auf ier endigen und nur eine Sylbe ausmachen; als, muſketé'er, dominé'er, — cavalié'r, cordelié'r; wo der Laut allemal iſt wie ér (ihr).

In *er*.

Die Wörter, welche ſich auf *er* endigen, und größtentheils Nomina ſind, die von Verbis gebildet werden, oder Adjectiva im comparativo, die durch die beygeſetzte Sylbe kenntlich gemacht werden, behalten eben den Accent, den ihre Stammwörter haben: als ra'cer, roman'cer, wi'ſer, ſo'berer.

In vielſylbigen, nicht abgeleiteten Wörtern liegt der Accent größtentheils auf der antepenult.; als, ſcav'enger, allrol'ger, geog'rapher. In wenig Wörtern liegt der Accent auf der vierten Sylbe; als, al'abaſter, ſal'amander.

Der Accent liegt niemals auf der letzten Sylbe als nur in zuſammengeſetzten Verbis; als, refer', inter'; wo es den Laut des é (e) ér (er) hat. In allen andern Fällen wird *e* in ŭ verwandelt, und lautet ŭr (or); als, romanſur, ſalamandur.

Wenn die Endung *ger* noch ein *g* vor ſich hat, ſo erhält die erſte Sylbe allemal ihren eignen harten Laut; als, dag'ger, brag'ger. In den meiſten andern Fällen hat es ſeinen gelinden Laut; als manager, dowager, danger, manger; — wo jedoch ausgenommen werden, anger, finger, linger, welche ausgeſprochen werden, als wenn ſie geſchrieben wären, ang gur (ángkor), fing gur (fingkor), ling-gur (lingkor). Einige behalten den Laut ihrer Stammwörter in *ing*; als ſlinger, ſinger, ringer — welche ausgeſprochen worden, ſliug ur (ſlinger), ſing-ur (ſinger), ring-ur (ringer). *Conger* und *monger*, mit ihren abgeleiteten Wörtern, werden ausgeſprochen cong-gor (kangkor), mung-gur (mongkor), fiſh mung-gur, (fiſchmongkor), u. ſ. w.

Die Endung *er* lautet allezeit wie ŭr (or, er).

In *or*.

Wenn die Endung *or* den Vocal *i* vor ſich hat, ſo bildet es mit demſelben einen Doppellaut indem es den vorhergehenden Conſonant mit zu der Sylbe nimmt; als ſenior, inferior u. ſ. w.

Wenn der Sylbe *ſor* ein Conſonant vorgeht, ſo kömmt der

Accent auf den Consonant zu liegen, wovon nur *confessor* ausgenommen ist; steht aber ein Vocal vorher, so ist der Accent auf der antepenult. Wörter, die sich auf *tor* endigen und größtentheils von Verbis abgeleitete Nomina sind, behalten den Accent, wie ihn die Stammwörter haben; als, dedicator, equivocator, translatoru.s.w.

Alle Endungen in *or* werden ur (or) ausgesprochen; als, seniur, dedicatur. Eben das hat statt in der Endung *our*; als, neighbur, behaviur.

In *ess*.

Vielsylbige Wörter, welche sich auf *less* und *ness* endigen, und überdies größtentheils Substantiva sind, die von Adjectivis oder andern Substantivis abgeleitet worden, behalten den Accent ihrer Stammwörter; als, ran'somless, mer'cileſs, rem'edileſs — wick'edneſs, inquiſ'itiveneſs, deſ'picableneſs u. ſ. w.

Die letzte Sylbe hat den Accent nur allein in zweysylbigen zusammengesetzten Wörtern; als, depreſs', expreſs', aſſeſs', u. ſ. w. In andern Wörtern, als god'leſs, lar'geſs, duch'eſs liegt der Accent auf der penult. Ausgenommen ist nobleſs'.

Eſs, wenn es ohne Accent steht, wird *iſs* ausgesprochen; als wickedniſs, duchiſs u. ſ. w.

In *ous*.

Wenn der Endung *ous* die Vocale *e* oder *i* unmittelbar vorhergehen, so bildet sie mit denselben einen Doppellaut, und nimmt den Consonant, welcher unmittelbar vor diesen Vocalen steht, zu der letzten Sylbe; als cer'uleous, ſucceda'neous, ethe'reous — abſtemious, ſymphonious, nefarious, u. ſ. w.

Diese Wörter werden ausgesprochen, als wenn sie geschrieben wären ceru-lyus, abſte-myus u. ſ. w.

Wenn aber *e* oder *i* ein *a c* oder *s* wieder vor sich haben, so wird die letzte Sylbe kein Doppellaut, sondern sie wird ausgesprochen, als wenn geschrieben wäre *ſhus* (schos.); als herba'ceous, ſaga'cious, oſtenta'tious, ſenten'tious — diese Wörter werden ausgesprochen, als wenn sie geschrieben wären, herba-ſhus, ſenten-ſhusu.ſ.w.

In allen Endungen auf *cous* oder *ious*, ruht der Accent auf dem Buchstaben, welcher unmittelbar dem Consonant, der zu der letzten Sylbe genommen wird, vorhergeht. Eine Ausnahme ist jedoch, wenn der Vocal *i* diesem Consonant vorhergeht, wo alsdann der Accent auf diesen Consonant zu liegen kömmt; als hid'eous, pernic'ious, relig'ious, propit'ious, u. ſ. w. Diese werden ausgeſprochen, hid'yus, pernish'-us, u. ſ. w.

In andern Fällen liegt der Accent meistentheils auf der antepenult; als friv'olous, glob'ulous, mirac'ulous, volu'minous; Ausgenommen ist, wenn zwey Consonanten zusammentreffen, als, tremend'ous, concin'nous, enor'mous.

Die Endung *ous* hat jederzeit den Laut *us* (os); und ist niemals accentuirt, als nur in dem französischen Worte rendezvous, welches rondevo'o (rannděhwuh) ausgesprochen wird.

In *ant*.

Vielsylbige Wörter, welche sich auf *ant* endigen, haben den Accent auf der antepenult; als pred'icant, rec'reant, extrav'agant, luxu'riant, u. s. w. Ausgenommen ist, wenn zwey Consonanten in der Mitte zusammentreffen, als appel'lant, trium'phant u. s. w. Indessen hat doch das Wort prot'estant den Accent auf der ersten Sylbe. In vielsylbigen Wörtern liegt der Accent niemals auf der Sylbe *ant*, ausgenommen in den Wörtern confidant', complaisant; auch in zweysylbigen Wörtern liegt der Accent nicht auf der Sylbe *ant*, wovon aber die zusammengesetzten Wörter, als decant', recant', enchant', und zwey Nomina, a gallant', the Levant', ausgenommen bleiben.

In *ent*.

Die vielsylbigen Wörter, die sich endigen auf *bent*, *cent*, *dent* oder wo auch irgend ein andrer Consonant vor *ent* hergeht, wovon nur *m*(ment) ausgenommen wird, haben den Accent auf dem Consonant, der einer solchen Endung vorhergeht; als, incum'bent, exer'cent, dependent, u. s. w. Die Wörter aber, welche sich auf *ment* endigen und meistentheils Substantiva sind, die von Verbis abgeleitet worden, behalten den Accent ihrer Stammwörter ohne Rücksicht auf diese Regel zu nehmen, als estab'lishment; aston'ishment, embar'rassment.

Wenn der Vocal *i* einer dieser Endungen vorhergeht, so liegt der Accent auf der antepenult, und zwar auf dem einzelnen Consonante, wenn aber zwey oder mehrere Consonanten beysammen stehen auf dem ersten dieser Consonanten, als benef'icent, com'pliment, u. s. w.

Wenn *i* vor der Endung *ent* vorhergeht, so macht er eine Sylbe mit ihr aus; als, obe'dient, le'nient, dissu'dient, consen'tient, u. s. w.

Wörter, die sich auf *lent* endigen, haben allezeit den Accent auf der antepenult; als, benev'olent, flat'ulent, pu'rulent, u. s. w. Ausgenommen ist, wenn zwey *ll* zusammentreffen; als, repel'lent, attol'lent, wovon aber wieder das Wort ex'cellent eine Ausnahme macht.

Auch alle Wörter, welche sich auf *ment* endigen und nicht abgeleitete Wörter sind, haben den Accent auf der antepenult.; als lig'ament, tes'tament.

Die letzte Sylbe ist allein in den zweysylbigen Wörtern accentuirt sonst aber niemals.

In *est*.

Wörter, die sich auf *est* endigen und meistentheils Adjectiva im Superlativs sind, behalten den Accent der Stammwörter.

In *ist*.

Dies sind vorzüglich Nomina, die aus andern Nominibus oder Adjectivis gebildet worden sind; diese behalten ebenfalls den Accent ihrer Stammwörter; als, an'nalist, ra'tionalist, mor'alist, loy'alist.

In *y*.

Es giebt in keiner andern Sprache als in der englischen eine so große Anzahl von Wörtern, die sich auf *y* endigen; vielleicht endigt sich nicht weniger als der achte Theil des ganzen englischen Wörtervorraths darauf.

ay — In zweysylbigen zusammengesetzten Verbis und Nominibus liegt der Accent auf der letzten Sylbe; als delay', display', array', u. s. w. Vielsylbige Wörter haben den Accent auf der antepenult.; als yes'terday, lat'inday, call'away, u. s. w.

cy — Wörter, die sich auf *cy* endigen und meistentheils Substantiva sind, welche aus Verbis, Nominibus oder Adjectivis gemacht sind, behalten den Accent ihrer Stammwörter; als appli'ancy, bril'liancy, in'timacy, legit'imacy, u. s. w.

In nicht solchen abgeleiteten Wörtern fällt der Accent zurück auf die vierte Sylbe; als nec'romancy, chi'romancy — Ausgenommen wird, wo zwey Consonanten zusammen kommen, als, arisloc'racy, democ'racy, u. s. w.

fy — hat allemal den Accent auf der antepenult.; als rar'efy, ed'ify, fecun'dify, u. s. w. Und hier verlaßen sogar die abgeleiteten Wörter den Accent ihrer Stammwörter; als, person'ify, diver'sify — von per'son und di'verse.

Das *y* in fy (fei) hat immer seinen zweyten Laut.

Wenn aber *fy* durch *phy* ausgedruckt wird, so hat *y* seinen ersten Laut; als, philos'ophy', at'rophy'; der Accent bleibt aber auch hier auf der antepenult.

Gy — Auch hier liegt der Accent auf der antepenult.; als prod'igy, geneal'ogy, u. s. w. Es hat immer den Laut des sanften *g*, ausgenommen wenn noch ein *g* vorhergeht, als shaggy, soggy, u. s. w.

bly — Die Wörter auf bly sind Adverbia, welche aus Adjectivis und Participiis gebildet worden, und behalten den Accent ihrer Stammwörter; als, prob'ably, del'icably, indefat'igably u. s. w.

ly — Eben dies gilt auch von den Wörtern, die sich auf *ly* endigen; als pol'itic*ly*, delib'erately, indef'initely, voluntarily, u s. w.

My — hat jederzeit den Accent auf der antepenult. und zwar auf dem einzelnen Consonant der dem Vocal vorhergeht, oder auf dem ersten Consonant, wenn deren zwey oder meh-

rere ſind; als big'amy, in'famy, polyg'amy, phyſiog'nomy, Deuteron'omy, u. ſ. w.

Ny — In dreyſylbigen Wörtern liegt der Accent auf der antepenult.; als prog'eny, tyr'anny, cal'umny, u. ſ. w. In mehrſylbigen als ig'nominy, cer'emony, mat'rimony, und in allen auf *mony* ſich endigenden Wörtern. Ausgenommen iſt anem'ony. Auch werden die Wörter ausgenommen, welche ſich auf *gony* endigen; als hexag'ony, colmog'ony; und caceph'ony, monot'ony.

In *ry*.

Ary — hat den Accent auf der antepenult. in dreyſylbigen Wörtern; als lug'ary, di'ary, ſal'ary, ro'ſemary: und auf der vierten Sylbe in mehrſylbigen Wörtern; als, ſim'ilary, ex'emplary, epis'tolary, vocab'ulary, vul'nerary, ubiq'uitary, u. ſ. w. Ausgenommen wird, wenn vor der Sylbe zwey verſchiedne Conſonanten hergehen, als caravan'ſary, diſpen'ſary, anniver'ſary, (wo jedoch wieder ad'verſary ausgenommen wird), teſtamen'tary, parliamen'tary, (Ausnahmen davon ſind, com'mentary, mo'mentary, vol'untary). Da ac'ceſſary, nec'ceſſary u. ſ. w. nur Wiederholungen des Buchſtaben *ſ* ſind, ſo richten ſie ſich nach der allgemeinen Regel.

ery — hat meiſtentheils den Accent auf der antepenult. und nur allein in folgenden Wörtern wird er weiter zurückgeſetzt; del'etery, mon'aſtery, bap'tiſtery, preſ'bytery. Dieſe Endung lautet allemal e'rry.

Ory — hat in dreyſylbigen Wörtern den Accent auf der antepenult.; als pleth'ory, pri'ory, mem'ory. u. ſ. w.

In mehrſylbigen Wörtern liegt der Accent auf der vierten Sylbe oder auch wohl noch weiter zurück; als pro'batory, cu'batory, pil'catory, ded'icatory, ju'dicatory, paciſ'icatory, u. ſ. w.

Ausgenommen davon wird, wenn zwey verſchiedne Conſonanten zuſammen kommen; als compul'ſory, caleſac'tory, contradic'tory; — und hiervon leiden wieder folgende Wörter eine Ausnahme, def'altory, in'ventory, prom'ontory, re-c'eptory, per'emptory, rep'ertory, con'ſiſtory.

Dieſe Endung lautet, als wenn ſie urry (orri) geſchrieben wäre.

In *ſy*.

Die Wörter auf *ſy* haben den Accent auf der antepenult.; als fan'taſy, apoſ'taſy, lep'roſy, u. ſ. w. auf der vierten Sylbe in ep'ilepſy, con'troverſy.

In *ty*.

Die vielſylbigen Wörter, die ſich auf *ty* endigen und die

Vocale *e* oder *i* vor dieſer Endung haben, haben allgemein den Accent in der antepenult. auf dem letzten Buchſtaben dieſer Sylbe; als ſobri'ety, ſoci'ety, improb'ity, acer'bity, De'ity, ſpontane'ity, u. ſ. w.

Wenn der Buchſtabe *c* vor der Endung *ity* ſteht, ſo liegt der Accent auf dem *c* und wird wie *ſ* ausgeſprochen; als ve rac'ity, ſel c'ity, feroc'ity (werâſſiti, feliſſiti u. ſ. w.)

Wenn ein einzelner Conſonant vor der Endung *ity* ſteht, ſo liegt der Accent auf demſelben; als, timid'ity, frugality extreml'ity, barbar'ity, curiol'ity, u. ſ. w.

Wenn zwey Conſonanten dieſer Endung vorgehen, ſo liegt der Accent auf dem erſten Conſonant; als ſcor'city, fecun'dity, abſur'dity, infir'mity, u. ſ. w.

Dieſe Endung lautet allemal wie tſy (ti), wo *y* den erſten Laut hat.

Die angegebenen Endungen faßen beynahe alle Wörter der engliſchen Sprache in ſich, die wenigen, die andere Endungen haben, ſind entweder auf allgemeine Regeln nicht zurück zu führen geweſen, oder ſie würden ſo viele Ausnahmen zu machen verurſacht haben, daß wenig Nutzen davon würde zu erhalten geweſen ſeyn. Da ſie übrigens vorzüglich aus einer oder zwey Sylben beſtehen, ſo werden die feſtgeſetzten Regeln für den gröſten Theil derſelben die Ausſprache hinlänglich bezeichnen; und da, wo dieſe Regeln nicht hinreichen ſollen, giebt das Wörterbuch hinlänglichen Aufſchluß.

Gegen dieſe Sheridanſchen Grundſätze hat nun der oben angeführte Verfaßer der Caution &c. einige Einwendungen gemacht, wovon die vornehmſten dieſe ſind: er will nicht, daß die Wörter auf *ture &c.* geleſen werden ſollen tſhur (tſchor) als nature na-tſhur (nehtſchor), ſondern als wenn es geſchrieben wäre, natyure (nehtier); ſo ſollen auch die Wörter auf *ſu* nicht ſhu (ſchu) als cenſure ſenſhur (ſennſchor) — ſondern cenſyure (tenſier) geleſen werden. Vor der Sylbe *ure* will er ein y gehört wißen, als ſure ſoll ausgeſprochen werden ſyure; u. ſ. w das übrige betrifft noch theils einzelne Wörter, theils einige Bezeichnungen der Ausſprache; von welchem eine weitere Anführung um ſo mehr überflüßig hier iſt, da im Wörterbuche meiſtentheils die doppelte Art der Ausſprache, die ſich bey einigen Wörtern findet, angegeben worden iſt.

Der Gebrauch des Sheridanschen Wörterbuches verlangt nun nothwendig, daß man das Schema der verschiednen Laute der Vocalen, welche mit den Ziffern, 1, 2, 3, bezeichnet worden sind, dem Gedächtniße eingeprägt habe. Nach diesem Schema sind die Laute durch das ganze Wörterbuch bezeichnet. Zuerst steht das Wort wie es geschrieben, und hernach wie es ausgesprochen wird. Wenn ein Vocal den Laut eines andern Vocals annimmt, so zeigt die erste Reihe den Vocal, der ausgesprochen wird; als: flir flür (ſtorr), blood blŭd (blodd).

Alle uneigentlichen Doppellaute, die Sheridan Doppelbuchſtaben benennt hat, wo nemlich zwey Vocale geschrieben werden, aber doch nur ein einfacher Laut gehört wird, werden in der zwenten Reihe durch den Vocal angedeutet, welcher wirklich ausgesprochen wird, als:

Bear bāre (behr) head hed (hedd) Groan grōne (grohn).

Das ſtumme *e* ſteht zwar auch in der zweyten Reihe, jedoch ohne ein Zeichen über ſich zu haben

Eben dies hat auch bey den Conſonanten ſtatt, indem in der zweyten Reihe jedesmal der wirklich ausgeſprochen werdende Conſonant ſteht. Alle Conſonanten die zwar geſchrieben, aber nicht ausgeſprochen werden, ſind in der zweyten Reihe weggelaßen worden.

Der Accent ſteht genau bey dem Buchſtaben, auf welchen der Accent in der Ausſprache ruht.

Die Sylben der Wörter ſind endlich in der zweyten Reihe nach der Weiſe getheilt, nach welcher ſie ausgeſprochen werden müßen.
